NOT TO OPEN DEBATE

Dynamic European styling components for Porsche® Boxster®, Porsche® 996 and Porsche® Cayenne® cars

Styling components offered by LLTEK on this page:

- Front bumper with carbon fiber or Kevlar louvers, brake duct and front intake slats
- Sculptured side skirt set
- Rear bumper with either carbon fiber or kevlar lower center accent
- New optional side air intakes with either carbon or kevlar slats
- Refer to page 172 for details and pricing

AT LLTEK we are very fortunate and we really do see innovative and fantastic styling products. Often samples appear at our door unannounced, waiting for our evaluation. However, no product like Caractere's styling program for Porsche® cars has evoked such emotional and positive feelings. LLTEK is Caractere's North American importer for all Audi styling products. When we were informed by Caractere that they would be producing styling products for the Porsche® 996, Boxster®, Boxster® S and eventually Cayenne®, we knew the designs would be extra special. We, and now you, are not to be disappointed. This is quality and superior design with quality manufacturing in the finest of composite material. Fit is impeccable. When the saying "a picture is worth a thousand words" was phrased, it truly represents the styling genius of these new products for current Porsche® cars. Pricing and specifications on page 172.

The line of LLTEK product for Porsche® cars will grow and develop. For additional information we invite you to visit our website.

Kevlar

Pricing on
 page 172

Styling components offered by LLTEK on this page:

- Front bumper with carbon fiber or Kevlar louvers, brake duct and front intake slats
- Sculptured side skirt set
- Rear bumper with either carbon fiber or Kevlar lower center accent
- Deep dish side air scoop set in carbon or Kevlar
- Refer to page 172 for details and pricing

SEVERAL TECHNICAL FEATURES:

The redesign and restyled front bumper incorporates similar airflow technologies found on the Porsche® 911 GT2® and many 996-based race cars. The technology is designed to reduce lift forcing the 998/986 to stay firmly planted at high speed. Next, the lower carbon fiber intake splitter directs fresh air to the left and right brake areas to improve cooling and brake performance. The three oversized air intakes allow superior air transfer. Finally, the GT2-type carbon fiber louvers provide trapped air exit release for improved down pressure and cooling.

TUV TEST REPORT Downforce results:

At a speed of 260 KPH (155 MPH), reported tests performed by the German TUV showed increased downforce with Caractere's front bumper installed over the stock Porsche® bumper for the Porsche® 996, 986 and Boxster® S.

OCCI Design: New Six piece Styling kit for 996

For the Porsche® 996: 2002 (new headlight) and upward. This unique lower aero styling program is sold as a complete 6-piece kit with a special reduced price for match paint service. The kit consists of a conservative yet very elegant lower front lip spoiler, 2 special front air intake modifiers to divide the air intake area into 3 distinctive sections, a set of tasteful side skirts plus a dynamic rear lower bumper skirt. This European manufactured kit is a very well designed upgrade for the Porsche enthusiast who desires an exciting upgrade at a very reasonable cost. Although not part of the kit configuration, we suggest you consider ordering the newly released 3-piece rear wing and speedster cowl for cabriolet.

SPECIAL PAINT OFFER
Save time. Save money.
Match paint for all 6 pieces is only \$444!

Air intake modifiers notes: A

These easily installed pieces divide the factory air intake area into 3 distinct sections and creates a more sporty look without heavy modifications. This is a clever yet simple modification that completely changes the front of your car into a personalized and understated vehicle.

OCCI
BY DESIGN

Spectacular exhaust tips set in stainless steel and chrome

Styling components offered by LLTEK on this page: Lower front lip spoiler and air intakes • Sculptured side skirt set • Rear lower bumper valance • Chrome stainless steel tips • Speedster cowlng • 3-piece rear spoiler

Elegant Trunk spoiler for 996

New 3-piece Trunk Spoiler for Porsche® 996 (2002 on)

A nice conservative rear wing which is very easy to install with provided polyurethane glue. Adjustable lift function maintained. Match paint available. Fits all 996 coupe and cabriolet models as per photo below.

Tastefully styled 3-piece spoiler kit

Introducing a speedster-look for the 996 Cabriolet : Take your Cabriolet to a higher level

Convert your 996 Cabriolet quickly and easily to a speedster look. Gain not only good looks but newfound private storage space. The front centerpiece bolts directly to existing hardware points so no need for drilling nor modifications. With this centerpiece on the car, the convertible top will still go up and down. Simply remove (quickly and easily) the rear pieces and store safely in the car and in the provided padded covers. Also included is a clear center wind deflector and a safety switch to deactivate the convertible top when Speedster covers are on. All parts are high quality. Fit and finish are excellent. Available in match paint.

SPECIAL PAINT OFFER
Save time. Save money
Match paint for
all 6 pieces is
only \$444!

Styling components offered by LLTEK on this page: Speedster cowling • 3-piece rear spoiler • Seat back shells • Side skirts • Lower rear valance

Anatomical Seat back Shells for Porsche®

Fits 986 and 996 standard seats*

If your Porsche® (Boxster® and 996) car does not have factory sport seats, this conversion kit is definitely for you. You can now easily and cost effectively upgrade your car. This set of ABS plastic shells invigorate the look of any Porsche® car. Included is all hardware, 4 bolster inserts for added shoulder support and good looks. Fit is excellent and installation is very easy. Consider match paint or contrasting paint color as an option.

OCCI designed seat back shells and bolsters with optional paint shown on Porsche® Boxster®

Introducing EXT styling for 996!

LLTEK people travel the world extensively to find and research unique and exciting products for its customer base. Visits to quality factories, design studios and laboratories are not uncommon. Key ingredients for a successful product line are as simple as ABC:

- A. Dynamic styling and smooth integration of all components**
- B. High quality manufacturing for a superior no fuss fit**
- C. Responsible purchase price of each item under consideration.**

A. Dynamic Styling and Integration: As you examine these new styling products, you can see exactly how a superior designed aero styling kit can seamlessly integrate into the overall look of the car. Each of the EXT styling pieces are dynamic, well thought out and take the car to a higher visual level. Even standing still the car looks like it is ready for serious business.

B. High Quality Manufacturing: It starts with high quality molds with prime attention to detail. Without this desire for perfection it would be a non-starter. EXT understands and is committed to quality, fit and finish. Although the installation of a full aero styling kit requires a fundamental knowledge of car components, the installation of this kit is far easier and faster than one would imagine. It is basically bumpers off and bumpers on. Add the side skirt set and install the rear wing. A competent parts or collision shop can easily handle the installation. And to further lower your costs and to simplify matters, seriously consider our paint offer. Our match paint program uses Standox paints from Germany. Our in-house facilities are excellent. We have been painting styling products for years.

Full front bumper with generous air intakes for improved air flow. Matching lower splitter available in composite or carbon fiber, side skirts, rear spoiler and clear sidemarkers.

C. Responsible Purchase Price: LLTEK has always believed in high quality product but at a fair price level to the customer. But EXT product comes directly from Europe with currency values that constantly fluctuate. Transportation costs are high. The manufacturer must factor in cost of molds, cost of design and, of course, production costs. Still the EXT styling program is excellent value and a great investment. But there is more. LLTEK has created a discount program for complete styling kits (roof spoiler is priced separately and is not part of the kit discount).

What more can we say. Dynamic styling and smooth integration of all components, high quality parts built in Europe with attention to detail plus craftsmanship and priced responsibly. Factor in the kit discount on components and paint and you will recognize a superior product offering from the LLTEK team.

NOTE: design and specifications subject to upgrades and refinements.

Optional add-on under spoiler

EXT is a win-win styling solution: awesome looks and improved airflow

Rinspeed Interprets the Porsche® 955 Cayenne® **RINSPEED**

Rinspeed of Switzerland is a design specialist group who for several years has provided "concept car" designs on behalf of leading European car manufacturers. The Rinspeed team designers are known for their smooth fluid design concepts using OEM styling queues yet moving the design philosophy upwards three to four notches. In other words, design was focused on quality styling, not outright radicalism. Rinspeed also has an internal group focused on performance development and you will see that performance products are part of the Rinspeed package.

Rinspeed decided to produce its own styling concept of components for the Cayenne and has displayed an exciting design without a radical look. The presented designs in these pages are considered the "Stage One" program. Look for a slightly more aggressive lower front spoiler (valance) incorporating HID Xenon lights as part of the LLTEK "Stage Two" program. Still later there may be a final LLTEK "Stage Three" program where a new full front bumper will be introduced, highlighting a very interesting combo Turbo and S look. When it comes to handling, braking and performance, Rinspeed has produced outstanding products for the money. The quality from this Swiss company is excellent. Each part fits - there are no radical alterations to be made.

Styling upgrades for Cayenne®: Lower front bumper, wheel arch extenders, 20" wheels, big brake kit and lowered suspension

NEW LOOK! 955 TAIL LIGHT ASSEMBLY

featuring a match paint option, LED output. A stunning and unique styling addition for a very special 955! Meets E-code specifications. Not DOT. For offroad use in USA/CAN

Arnage V22 Wheel for Cayenne®

The Arnage V-22 wheel for the Cayenne is 22" x 10". The stainless steel outer rim is deep dished plus highly polished. Valves are flush fit stainless. The 6 highly styled spokes are coated with New Titanium Paint. This mono block is studded for the 2 piece look. Styling is clean, elegant yet simple. The look is superior without being arrogant. There is sportiness in this luxury wheel.

5/130 PCD
ET50

All Cayenne Models.
Also available for VW® Touareg®.

**New Titanium Spoke Paint
265/35 tires recommended**

Leather cellphone base, aluminum sport pedals and much more!

RLMS Module for Cayenne® or Touareg® Only with Air Ride Suspension

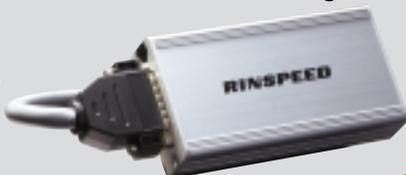

If your Porsche® Cayenne (or VW® Touareg) was delivered with air suspension, the new and exciting RLMS electronic module can quickly improve both handling and looks.

It is a plug-in and plug-out module. The initial installation takes about one hour. No mechanical work to the suspension is necessary. The unit allows an extra lowering height of 40mm at the front axle and an extra 30mm to the rear axle. Adjustment increments are plus or minus 20mm. The factory electronic control system such as ride leveling switch, diagnostics, PSAM, PTM, PSM are not affected. A supplied plug allows a return to production settings in about ten minutes.

With a lower center of gravity, your car will be better balanced and handling will be improved ... and so will the look of the car.

Specifications subject to change.

Provides more than 1.5 inch (40mm) of additional lowering for hunkered down stance and superior handling!

Modular hitch bike carrier system and trailer hitch

LLTEK offers a complete selection of heavy duty trailer hitch and hi-tech bicycle carriers to match the active lifestyle of many Porsche® Cayenne® owners. Refer to the appropriate roof rack system, bike rack and trailer hitch section on page 41.

Class III hitch system

Bike rack pivots out to permit easy access to luggage compartment!

Lower rear valance, hatch blend (Euro model shown, USA/CAN available), wheel arch extender, RS1 wheels, quad exhaust system and lowered suspension on Porsche® Cayenne

Wheel arch kit and big wheels!

BIG brakes:
A very safe investment!

Rear hatch blend USA/CAN model. Quad tips or complete exhaust option also available

Optional quad tips in stainless steel, sport muffler or complete catback exhaust system are available from LLTEK.

Solid billet satin finish TUNER SERIES® pedal set and dead pedal: Available for manual or Tiptronic® Porsche® Boxster®/S® or 996. All sets feature high quality solid billet CNC construction with beaded non-slip surface. Direct from Germany.

Aluminum bezels: 5-piece set for Porsche® 996 or 3-piece set for Porsche® Boxster®/S®. Stylish upgrade to instrument binnacle. Easy installation.

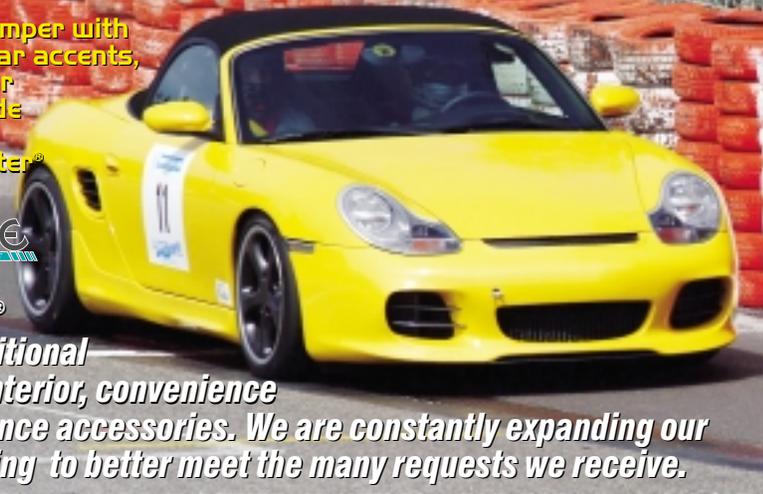

Leather base support: Designed for cell-phones, PDA, GPS receiver, MP3 devices or other modern day electronics. Allows for hands free operation. Very stylish, very safe and stable platform. Black leather with perfect fit to center console. A custom made product! Includes 2 velcro disks.

LLTEK front bumper with carbon or Kevlar accents, side skirts, rear bumper and side air scoops for Porsche® Boxster®

Your Porsche® deserves additional attention to interior, convenience and performance accessories. We are constantly expanding our product offering to better meet the many requests we receive.

Elegant spoiler for Porsche® Boxster®/S® (not for 2003 on): Quiet elegant spoiler designed for great looks while providing downforce for stability. Replaces factory spoiler and easily installs.

Competition style spoiler for the Porsche® Boxster®: Highly styled, technical trunk spoiler for the serious enthusiast. Superior down pressure. Excellent in track events. Factory spoiler remains in place.

Speedster cowling for Porsche® Boxster®: A perfect addition to any Porsche Boxster to create a historic transformation. Installs easily in minutes. Stores in supplied protective bag when not in use. High quality match paint available.

B&M short shifter program:

Fully track tested and ready for the streets. The CAD designed and totally re-engineered bolt-on replacement for shorter shift throws. Increases shift accuracy and creates a dreamy super precise shift feeling. The bottom end is counterweight balanced for a perfect and precise feel. CNC machined from extra tough 303 stainless steel plus 6061-T6 aluminum for perfect leverage. Your cutting edge short shifter installs easily to give you the driver's edge. Fits 986 and 996 cars.

Cold air induction system for Porsche® 996 or Boxster® / S®: Better airflow characteristics and a cooler denser air charge are the keys to improve power delivery from your Porsche® Boxster® or 996 engine. By design, factory air intakes are a compromise brought on by strict noise regulation. LLTEK offers Porsche® car owners many approaches to the problem. All LLTEK air intake systems are designed to vastly improve airflow while producing a sporty note at the intake level.

Air Induction STAGE 1 system: Replaces restrictive factory plumbing with straighter ducts to the factory airbox. A hi-performance K&N high-flow reusable flat panel filter is included with all installation hardware. Specify Porsche® 996 or Boxster®/S® when ordering.

Air Induction STAGE 2 system: Engineered for maximum power and engine note. The best value for impressive power gain, short of major and very expensive engine modification! From the improved airflow characteristics of the STAGE 1 system, add the replacement of the factory airbox with a redesigned airbox equipped with a low-restriction cone air filter and heat shielding. All ducts are custom made in crosslink polyethylene polymers to fit Porsche® cars. Specify Porsche® 996 or Boxster®/S® when ordering.

Lower rear diffuser UPDATER for Porsche® Boxster®/S®: Transform the look of your seasoned Porsche® Boxster® to the current generation with an easy to install lower diffuser updater. Simply bolt and glue the 2 pieces and you are done. Adds a sophisticated touch and redefines the exhaust tip area minus a whole bumper swap. Plus your Boxster® will now look like the current model. Match paint recommended.

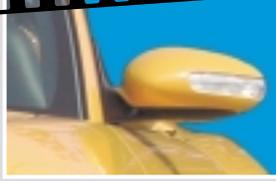

RETROLUX® R full mirror system for Porsche®

For Porsche® 996 and Boxster®. Full remote control functions with heated wired. Installation is relatively painless. Available paint to match, chrome or exclusive brushed RS silver finish! Call for details and availability. Integrated flasher system easily

Sport mirror shells with integrated turn signal:

Direct from Germany, beautiful styling addition to any Porsche® Boxster® or 996. Utilizes the original glass and motor. New wiring harness included for turn signal connection. Requires removal of door panels for installation. High quality match paint always available.

Krystal Klear Mini for Porsche® Boxster®/996

Two new side markers with mini amber. Direct replacement of factory unit.

Krystal Mini Black

Krystal Mini Chrome

Krystal line: Four tail light upgrades for Porsche® Boxster® / Boxster® S

Little things have always made a big difference. Each of these four E-code European specification tail lamp designs for the Porsche® Boxster® are subtle yet modern upgrades. Each contributes to an elegant approach to personalize your Porsche® car. These are full tail light assemblies. They are not just an outer lens. Direct from Germany these units are of high quality with a unique design approach. They are also very easy to install.

A. KRYSTAL RS RED

Upgrade look, clear upper section with red lower section

B. KRYSTAL RS BLACK

Smoke tint upper section, lower red section

C. KRYSTAL BLACK

Complete blackened lens, dramatic effect

D. KRYSTAL KLEAR

Full clear lens, very technical

TAIL LIGHT NOTES: Depending on light conditions, even though tail lights are pictured clear or smoked, interior reflections and bulb components can be visible producing some red artifacts. Specifications subject to change.

Armrest Base Extender

Increase the storage capacity and convenience of the OEM armrest with this easy-to-install leather extension base. The ergonomic design provides a higher more comfortable resting position for driver or passenger and adds lockable storage for small items.

- 996 – Specify year, color, coupe or cab
- 986 – Specify year and color
- Special order (2 – 3 weeks delivery)
- Model specific (special order)
- Creates larger lockable storage
- Optional cup holder (folds inside)
- Lockable (2 keys provided)

Current Leathers:

- Grey (Graphite or Space)
- Black – Savannah
- Boxster Red
- Metropole Blue
- Natural Brown

Powerful HID conversion program for older Porsche® cars:

All Porsche® 996 and 986 Boxster® cars delivered with standard Halogen H7 bulbs can be quickly upgraded to real HID Xenon status using the "Serious Vision" conversion kit. This is a true DS1 HID upgrade. Bulbs are 5,900 °K or greater. A set of ballast and igniters, click together wiring plus ballast supports are provided.

NEW H4 Hi/Lo HID

For older Porsche® cars which use Halogen H4 dual filament bulbs, LLTEK has a new switchable HI/LO H4 HID upgrade kit. For additional information and pricing, refer to the HID lighting section on pages 45 to 57.

THE LLTEK WAY: hard work and attention to details for you

We put our hands to work every day to ensure a better trouble-free product. We paint and install parts on actual cars to test fit installation procedures. We take our own pictures for web and catalog. LLTEK goes through a lot of effort so you won't have to. All these efforts are what we are about: quality, knowledge and dedication.

Shown front bumper with carbon fiber, side skirts and rear bumper

LLTEK CERTIFIED INSTALLATION DOCUMENT

WARNING:

If your Caracere instructions for 996/986/S do not look like the color ones shown, you may have incorrect, counterfeit or incompatible European variations which do not correctly fit or may be of inferior quality.

Installation diagrams for Porsche 996, Porsche Boxster and Boxster S Front Bumper and Boaster S. Includes step-by-step instructions, diagrams of the bumper assembly, and a 'CERTIFIED INSTALLATION' seal.

AIRFLOW HANDLING SYSTEMS RESULTS IN BETTER BRAKING!

PAINT CODE LOCATION

Locate the Porsche® identification label in your maintenance manual. This label lists the specification of your car as it came from the factory. Locate your paint code number as per the example below. Insert your Porsche® Paint Code here for your future call to LLTEK.

My Paint code is L [] [] [] For example L 8 4 A

3-digit Paint Code number in maintenance manual ...

PS Rack System for Porsche® Boxster®: Without question, the PS Rack System is perfect for the Porsche Boxster. You permanently install the virtually invisible under bracket. Then the PS System slides into place. Three interchangeable variations: Snow, Bike and Golf/Luggage. For full information and pricing, refer to the PS Rack System section on page 40 in this catalog. Note: When not in use the rack fits neatly into the trunk. Once installed, trunk access remains.

SEE PAGE 40 FOR PRICING

... or under the front trunk lid

CAYENNE® PROJEKT!

LLTEK intends to introduce a series of interesting and useful products for the new Porsche® Cayenne®. At time of publishing finalized data on new styling products was not yet available. However, look to LLTEK to provide newly styled front bumpers, lower side accent panels, a redesigned rear bumper, aluminum brush bars, roof spoilers and HID roof lighting accessories. Some products are already starting to trickle in so stay in touch.

No Porsche® Cayenne® should be without the handsome German manufactured leather cell base which can also be used for PDA, GPS or MP3. For a low rise trunk liner at a reasonable price, LLTEK will have you covered. If your car arrived without the factory Xenon HID system, consider an OEM factory upgrade to the full Euro spec HID Xenon lights. Alternatively you can purchase the LLTEK HID Xenon upgrade kit which retrofits into your existing headlamp.

CARACTERE CAYENNE® STYLING IS COMING!

Stay tuned to WWW.LLTEK.COM for the most up-to-date information.

PURIM materials

LLTEK supplied lower front bumper, wheel arch extender, lower side accents and 20 in. wheels shown on Cayenne®.

High flow exhaust system for Cayenne®

Not loud yet others will immediately recognize your Cayenne® is from a different world! (Requires OEM turbo valance or aftermarket valance). **Are you ready to rumble?**

Factory headlight Program for Porsche® Cayenne®

These E-code headlamps are OEM factory original Valeo with European output (E-code) lighting specifications. They produce more usable light via superior and tighter optic designs. If your car was delivered without HID Xenon, you can now upgrade the entire assembly and end up with superior HID lighting than North American Cayenne cars. Should your already HID equipped vehicle encounter a small projectile resulting in headlight damage, LLTEK has the E-code replacement version at a lower cost. If you wish to upgrade your existing Halogen Headlamp to Xenon, consider the affordable LLTEK cost solution which provides a genuine upgrade to HID.

Turbo Xenon upgrade or replacement (E-code or DOT)

Halogen upgrade or replacement (E-code or DOT)

Leather accessory base for Porsche® Cayenne®

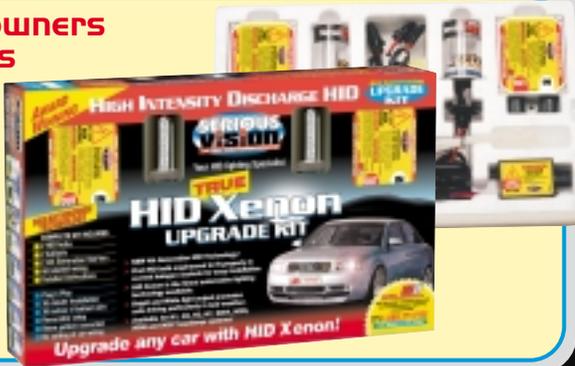

Direct from Germany in hand stitched leather, LLTEK offers the made-for-Cayenne cellular telephone holder. This device correctly positions your electronic appliance of choice. Installation requires no drilling nor cutting. Use the manufacturer's cell cradle or a magnetic holding device. Quick start velcro discs included.

VELCRO® DISCS INCLUDED with holder

ATTENTION: Cayenne® owners with Halogen headlamps

Choose the powerful HID genuine upgrade kit for installation into your Porsche® Cayenne®'s Halogen headlight assembly. This low cost upgrade will give you true HID Xenon using 5,900°K bulbs or greater. It is a fast, easy upgrade. For additional information refer to the lighting section on pages 45-57.
