Public service...
 with style!

The new VW® Touareg® is an exciting car built with purpose. Reviewers world-wide only have praise for the performance this vehicle can deliver. Now, LLTEK brings the car to the next level of styling. This is your opportunity to personalize the car and move the styling in the direction of your choice.

We present product by leading edge aftermarket stylers. Some products are true performance related while others are designed to express one's personal taste. As time progresses, look to LLTEK to deliver more new and exciting product for the VW® Touareg®.

Check out our website (WWW.LLTEK.COM) or pick up the telephone and call our toll free line for the latest developments for this exciting SAV (Sport Adaptive Vehicle)!

VW® Touareg® Paris-Dakar Rally contender kicking a little sand!

Some accessories on this page are not sold nor available through LLTEK Motorsports. VW® Touareg® Dakar pictures provided by VW Media Services. NOT YOUR REGULAR TOUAREG®...

STYLING ADVANCES FOR TOUAREG®

Direct from Europe, this exciting new styling package is perfectly executed. Once installed, your new version of the VW® Touareg® will set you apart. Take advantage of the package discount. A complete kit includes the front bumper accent, sport grill, wheel arches, stainless steel sides, roof spoiler, hatch blend and rear lower center trim (A-G). Make the transformation complete, do it all! To assist you, check out the schematic below.

Ultra recessed sport grill with optional LLTEK badge

Pedals and footrest

Front bumper accent shown with optional 3 color paint scheme:

1. Match painted frame
2. Mid bar in flat black
3. Lower plate in RS Silver

Roof spoiler by Caractere

Get down with style: Introducing the RLMS!

If your Touareg® was delivered with the optional air suspension, our new and exciting electronic RLMS module can quickly improve handling and looks. It is a plug-in and plug-out module. No mechanical work to the suspension is necessary. The unit allows an extra lowering height of 40mm at the front axle and an extra 30mm to the rear axle (plus or minus 20mm increments). The factory electronic control system are not affected. A supplied plug allows a return to production settings in about ten minutes. Each RLMS Module comes with a one year unlimited mileage warranty from the manufacturer. With a lower center of gravity, your car will be better balanced and handling will be improved ... and so will the look of the car.

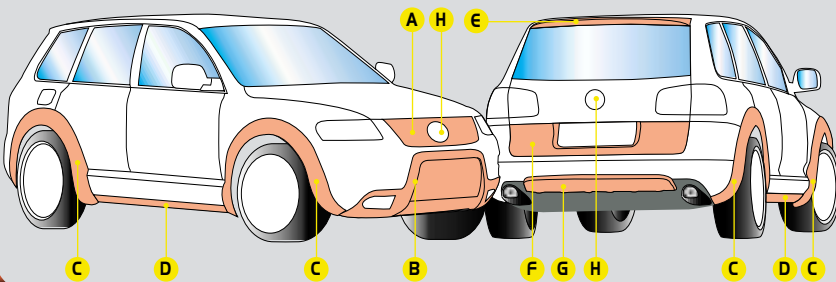

Aero kit for Touareg® explained:

FRONT AND SIDES

- A. Front 3D recessed grill
- B. Front spoiler / bush guard
- C. Wheel arch set (12 pcs)
- D. Stainless steel skirt accent

REAR ACCENTS

- E. Roof spoiler
- F. Lower hatch blend (USA or Euro)
- G. Rear lower center trim kit
- H. Optional LLTEK crests (Fr and Rr)

Lower hatch blend USA/CAN or Euro version available

Stainless steel skirt accent

Call your friendly LLTEK representative for information and to order

Rear lower center trim kit shown in optional contrasting RS Silver. Your Touareg® car looks just like this?

Modular Hitch bike carrier system and trailer hitch

Fits convoluted bike frame shapes

LLTEK offers a complete selection of heavy duty trailer hitches and hi-tech bicycle carriers to match the active lifestyle of many VW® Touareg® owners. Refer to the appropriate roof rack system, bike rack and trailer hitch section on page 41 of this catalog.

Class III hitch system

Leather base for Cellphone, PDA, GPS or MP3 device

Arrange Big Wheel set - 22x10 in. superiority

The Arrange V-22 wheel for the Touareg® is 22" x 10". The stainless steel outer rim is deep dished plus highly polished. Valves are flush fit stainless. The 6 highly styled spokes are coated with New Titanium Paint. This mono block is studded for the 2 piece look. Styling is clean, elegant yet simple.

The look is superior without being arrogant. There is sportiness in this luxury wheel. All Touareg® models with V6, V8 or V10 (Early 2.5 TDI cars require 5x120 PCD ET 50).

About Future LED Headlights

LLTEK is at the forefront of "headlight and lighting" upgrades, so it is not surprising **LLTEK** has advance and privileged information plus special knowledge of lighting products planned for future markets. The headlight you see is a pre-production headlight model for Audi's W-12 A8 car. The unit is scheduled for use in 2006 in Europe and possibly 2007 in North America, pending approval, performance, manufacturing costs and other marketing criteria.

So, what is all the excitement about? Look closely at the 5 over-sized LED's which can replace either Halogen or Xenon bulbs. In fact, the LED array is targeted directly at replacing Xenon systems. Plenty of development work remains including better brightness, control of beam patterns plus control of final production standards and costs. The good news is LED systems seem to last forever. They come on faster than Xenon which creates superior safety. In fact, rear LED tail light assemblies light up a quarter of a second faster than most incandescents, translating to 22 extra feet of reaction time at 60 mph. This is an important safety improvement which we believe Audi wants to bring to you.

LED's can also be controlled individually and Audi could easily design a broad LED headlight array with various supplemental LED's pointed off to the sides. These outside LED's could light up as you turn a corner, also providing better lighting and superior safety. Currently several companies use LED's in tail light

assemblies (**LLTEK** features 3 hot E code versions for the current A4 on page 55 and 119). LED headlight development is progressing quickly. A special A4 LED headlight is already used on Audi's ultra hi-performance DTM Race Car shown on several pages throughout the catalog. And look closely at the headlights in the **UBERHAUS** upgraded S4. Can you spot the LED headlights? Stay close to **LLTEK** for future developments and news on this exciting new technology.

LED on board! See pages 90 to 93 for S4 upgrade.

Material of Choice: your decision

The styling products **LLTEK** sells are manufactured mostly in Europe. **LLTEK** cannot tell the designer/manufacturer what material should be used in the product. No matter what material is used, the painted version always looks perfect, assuming proper painting measures are employed.

So what is the best material and why? The best material is **PURIM**. This is the highest quality level for front bumpers. It's strong, it's semi-flexible and good for little bumps. It's also best for mini stones which often deflect off the bumper with no visible scratch. **PURIM** mold costs are very high (about 85,000 Euros). Therefore the finished product is generally higher than others. Currently **Caractere** makes their A4 8E front bumper in **PURIM**, as does **JE Design** for their lower add on. Both make their 8E side skirts in **PURIM**. The **RSR** front bumper for the older A4 B5 is made in **PURIM** as well. **PURIM** is what all manufacturers use today for their bumpers including Audi®, Porsche®, VW®, BMW® and Mercedes®.

Other materials used are **RIM** (a hardened non flexible version of **PURIM**). **RIM** is found often on grills, spoilers, frames, etc. Fiberglass is an excellent material. It's light and easy to repair. Quality is excellent. Companies like **Caractere** use a variant of fiberglass called composite. Composite is fiberglass except the gel coat is part of the manufacturing process rather than a separate step. **Caractere's** composite parts for Porsche are of extremely high quality with perfect fit. **ABS** plastic is often used by **Rieger**, **UBERHAUS**, **Kerscher**, **JE Design** and **Zender**, depending on the product. **ABS** is lightweight, easy to produce and takes paint well.

When parts are ordered unpainted, you will receive them in the same condition as we do. Remember, the key to perfect looking paint is 45% in the preparation stage and 45% in the quality of paint and painter. The last 10% is in post painting (wax, polish, buffing). That's what the **LLTEK** paint team gives you, 100% all of the time when you order painted product.

RSR Front Bumper and RS Sport Grill in flexible PURIM

Three exciting new Audi models

The **LLTEK** catalog contains numerous interesting parts, upgrades and accessories. Missing from the catalog are components for the exciting A3 Sportback, the soon to be released A4 Facelift car and the very new and exciting A6. Rest assured **LLTEK** will work with its various overseas suppliers to bring great products to the market for these great new cars. Look for the **LLTEK** 2006 catalog to feature these cars or interim supplemental catalogs, or never be shy and pick up the telephone and dial the **LLTEK** toll free number to ask if any new products for these cars have arrived. Of course our website will announce all new products on a timely basis.

Audi Rings on Enhanced Styled Sport Grills

The four inter-connected rings on factory Audi grills are a registered trademark of Audi AG. They are an important part of Audi's corporate identity making their use and control an important aspect of building and maintaining their reputation. **LLTEK** cannot sell the Audi rings. Only Audi dealers sell Audi rings. However, **LLTEK** does sell many aftermarket front grills that are definitely superior styling product. Some Audi enthusiasts want to re-use their ring set on their new grills and some elect for the clean "no ring look". For those who wish to re-use the rings, the re-installation procedure is very simple.

The original rings are held in position by several plastic tabs. A small amount of pressure on the tabs releases the rings. Position the rings on the new grill in the appropriate position. Depending on your new grill and its mesh pattern, you may or may not have to cut off the little plastic tabs. Assuming you must cut, their removal is simple. Then you need only some clear waterproof urethane glue. In fact, many adhesive products will work well. Use tie wraps or even heavy books to create bonding pressure between the rings and the grill. Wait a full day and voilà, the rings will be strongly seated on the grill! Note, some manufacturers (**Caractere**) often provide an integrated grill attachment plate. In these cases the transfer is even easier. Just snap the rings into the plate. Suggestion. For a more individual and custom look, visit your Audi dealer and pick up a set of rear trunk rings (about \$10). These are smaller rings with no tabs "so no cutting". There is a supplied sticky adhesive backing on these smaller rings but use glue to create proper bonding (the sticky adhesive is for a flat surface). Then offset the rings to one side for that "tuner" look. Remember, the **LLTEK** logo in a plastic badge is included with each of the grills we sell. But even our badge can be removed so all choices are yours.

Tie wraps* Glue*

* Not included

LLTEK badge included with every sport grill.
