YOU'VE GOT ROOM!

Today's active lifestyle requires Audi enthusiasts to carry more equipment to more places. Mountain bikes, skis, kayaks and sailboards can be easily secured to a high quality Roof Rack System.

LLTEK chose the Mondial "Best in Class" component roof rack system simply because it is the best and the best by far. Mondial is a system of individual quality components each working magically together.

Yes, the styling is ultra clean. Yes, complicated bolts and big overhangs are history with Mondial. Yes, the system is TUV (German) approved. Yes, the product line up is always evolving.

LET'S TALK TOPS! Mondial roof rack systems are a highly styled system with each component sliding into (not bolted to) the powder coated black or anodized aluminum crossbars. The aluminum is lightweight 6061T extruded – delivering superior strength at half the weight. The key to the entire installation is a patented micro-ratchet system making installation and release absolutely effortless. Also, Mondial's integrated locking system means no additional locks are needed for components. Take it off and re-install the bars in minutes.

Roof system characteristics Integrated lock system throughout • Tightening lever cannot be closed without being locked guaranteeing the rack and accessory attachments are automatically locked to your Audi • Built-in crank handle to create tension of pulling force equal to 10:1 ratio • Made of Acetate high-impact plastic • Reinforced with dual stainless steel rods in cross bars • Maintains its strength at high and low temperatures • 2 separate bar channels for accessories to slide into and lock into/on to • Patented, user-friendly micro-ratchet system • ARS™ Automatic Retention System • Oversized stainless steel pivot pins • All moving parts enclosed for security • Utilizes Softflex™ non-slip, soft surface rubber. Pads will not scratch car paint. Grooved pads to securely fit Audi roof edges (sedan only) • Clean design of pads reduces grime accumulation • Low profile bar design complements clean Audi looks • Each corner lock in high tempered steel • Edge hook covered with anti-slip PVC coating (sedan only) • Lightweight 6061T extruded aluminum.

SEDAN: HOW TO START

First you specify the appropriate size of the Mondial Roof Bar set. These two lockable bars are secured to the Audi roof utilizing a patented hidden micro ratchet system. To relieve pressure for fast removal, simply unlock the swing up protective cover and press the yellow hidden release button. Pressure is immediately released and the roof edge locks are disengaged. To reinstall, simply place the roof edge hooks in place and use the internal ratchet to re-apply pressure. It is that simple. All bar sets are finished in black powder coat ultra-durable paint for long life.

Available in
black only

AVANT/PIKES PEAK: HOW TO START

Mondial has developed a new high tech product just for Audi Avants. It is a unique custom designed low profile rail attachment device locking cleanly to the Avant (and Allroad) OEM factory roof rails. Instead of purchasing sedan cross bars and using an awkward adapter, you now have an Avant specific solution. It is called the Foot System for Avant (FSA) for Audi. Integrated into each lockable FSA is the Mondial patented micro ratchet device with available instant pressure release for a fast and easy disconnect. For each Avant system you require one 4 piece low profile raised rail foot kit (FSA - A02950). Next specify the 48" cross bar in anodized silver (A02971) or powder coated black (A02970).

Bars available
in silver or black

CHOOSE YOUR ACCESSORIES:

Mondial cross bars for the Sedan and Avant are internally channeled ready to accept any of the several Mondial accessories. Each accessory except Piranha*, slides securely into place. There is no messy drilling and no fumbling. Just "slide and secure".

A

COMPETITION A83IRE (full bike) black only

Feature Set: fits virtually any tire/wheel base combination • one piece U-arm for greater stability and safety • specially designed jaw and cushion • adjusts to extra large diameter frames (max. 1.75"/45mm) • easy to install on Mondial crossbars • locks to cross bar • corrosion resistant • reversible arm.

Specially designed jaw and cushion adjust to large diameter frames and protect the finish of your bike

B

HAMMERHEAD A829 (fork mount - 9mm) black only

Feature Set: heavy duty user friendly 9mm quick release • locks to bar • 6 foot resettable cable lock included • fully adjustable rear wheel tray with multi-adjust tire buckle retainer and rim protector • fits quickly and easily on Mondial crossbar • excellent corrosion resistance.

6 ft resettable cable lock included

C

PIRANHA FORK A859 (fork mount - 9mm/6mm) black with silver aluminum tray base

Feature Set: wheel strap with metal ratchet buckle • integrated wheel stabilizer • aluminum tray • fits 9 mm and 6mm forks • accommodates disc brakes • lockable quick release • easily slides over to Mondial bars or OEM crossbars.

Available in black with silver aluminum tray base

D

PIRANHA UPRIGHT A857 (Full bike carrier) Black with silver aluminum tray base

Feature Set: designed for newer bikes including oversize tube frame • works with disc brakes • lockable "wide fit" Piranha jaws • front and rear wheel straps with microadjustable buckles • integrated wheel stabilizer • wide body tray • solid transportation product • slides over Mondial bars or OEM crossbars.

FITS MULTIPLE FRAME SIZES

From 0.5 to 4 in. max

E

ATLAS A218 (Exterior wheel) black

Feature Set: companion product to fork mount • HD exterior wheel carrier • dual position 1) upright when used 2) straight back when free • aerodynamic profile • constructed with T4 lightweight aluminum.

F

AERO A312 (air deflector) black only

Feature Set: sedan only • not for Avant • reduces noise • improves gas mileage • made of UV protected ABS plastic • logo removable • easy and secure installation • usable with all Mondial summer and winter accessories.

G

AMAK A312 (water sport cradle) black only

Feature Set: fits sea kayak, surfboard, sailboard, rowing shell or white water kayak (2 positions) • soft, self-adjusting pads • slip resistant • pads designed to protect finish of hulls • durable tightening straps with metal buckles • easy to install.

H

INUK (kayak carrier) A311 (black) A316 (silver)

Feature Set: safely carries one river kayak vertically • allows for multiple stacking • made with high quality T6 aluminum • high quality and durable tightening strap with easy buckle • 2 finishes available • slides on to Mondial bar quickly and easily.

I

MOGUL (ski/snowboard) A444 (black) A446 (silver)

Feature Set: carries up to 6 pairs of Alpine or cross country skis • carries 4 snowboards • carries combination ski/board • completely lockable corrosion resistance covers on all locks • dual opening access bars from both sides of Audi slides easily on and off Mondial crossbar systems.

BIKE SKI GOLF

in style!

PS Rack Concept

If you want compact and lightweight high quality design, the new PS Rack System may be perfect for you. Here is how it works for the Audi TT, Porsche® Boxster® and Boxster® S® plus the new A4/S4 Cabriolet. A small but cleverly designed adapter plate is bolted to the underside of the car. Only 2 small receiver openings are visible. The TT Quattro version reveals a small part of the plate. "Rack ON" and "Rack OFF" takes minutes and the system folds and dismantles for easy storage in the trunk compartment.

The unique design also lets you switch quickly from bike rack (3 standard bikes) with adjustable height arms to a golf and luggage carrier (2 large bags) or to a snow rack. A single snow rack adapter carries 2 pairs of parabolic or fat boy skis or 3 pairs of cross country skis or one snowboard. A second inexpensive snow board adapter can also be ordered.

You can order your base system in one of 3 factory configurations: A) Bike Rack, B) Golf and Luggage Rack, C) Snow Rack (includes one rack). You can also order any of the 3 configurations as separate upgrade options. All mounting straps to car are included.

IMPORTANT: Recommended for use at legally posted speeds. Always secure all accessories with proper restraints. All golf bags should be used with hood securely closed or with a suitable golf bag cover. Handling of the vehicle at high speed with loaded golf/luggage configuration may be affected. Drive accordingly and safely.

Trailer Hitch System

General specifications – North America cars

- Hitch type: all models are Type R (receiver)
- Class type: Class I ⁽¹⁾
- Capacity: 2000/2500 pounds GTW⁽¹⁾
- Tongue load: 200 pounds⁽¹⁾
- Ball shank hole: 3/4 inch opening
- Included: ball mount and receiver pin
- Requires professional installation
- Designed for use with standard bumpers
- Car specific: models are not interchangeable
- No welding required. Bolt on (bolts included)
- Drilling into frame is always required
- Wiring kits available on request

NOTE 1: Audi TT special notations: requires minor cutting of bumper trim which is not readily noticeable. May require bending or cutting of tow hook and possible modification of exhaust hangers. Not suitable for use with a custom exhaust system.

NOTE 2: Installation on Audi requires bumper removal.

Bike rack option-C4

- Fits 4 traditional bikes / silver / reflector
- Adjustable Bike Beam (option 18016) creates a beam from seat to handlebar
- Receiver size: 1 1/4 inch opening
- Bike adapter to converts 1 1/4 to 2 inch size (D-185)

NEW! adjustable Bike Beam

Only LLTEK provides the new "Bike Beam" (above) as a solution to fix overly thick frames or Y-beam bikes. The Bike Beam spans the distance from seat post to handlebar so that the bike may be mounted on the carrier in the traditional manner.

D-185 Adapter

Converts 1.25 in. receiver to 2 in.

Another LLTEK First! Modular Bike Hitch System

Audi, Cayenne® and Touareg® drivers are discriminating and technical. Often they acquire very expensive and technical bikes. Quality and the ability to handle uniquely designed bike frames safely is important. So LLTEK is proud to present and explain the newest most advanced and feature-laden "Modular Hitch System". This is truly a case of "pay a little more and get a lot more". This system which attaches to trailer receiver type hitches of 2 or 1.25 inches (specify type), is designed to accommodate 99% of today's unique bike frames and designs. The hitch design provides a series of unique features never before seen. Yes, there are basic bike carriers that cost far less (we have them) but examine the "Modular" and you will understand why this dynamic system is truly the best for serious bikers or techno addicts.

Carry up to 4 bikes very securely

Pedal tilt feature Total access to trunk

System Fixtures and Features:

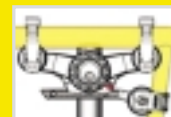

- Choose a head module for 2, 3 or 4 bikes
- Choose 2 or 1.25 inch matching receiver base
- Pedal tilt release for easy trunk opening with bikes on board
- One key dual lock cable system (two lock positions)
- Integrated locking cable sleeps within shaft for invisible storage
- Locking anti-wobble hitch pin
- Individual rotating bike mounts for unique bike designs
- Integrated multi-position anti-sway arm
- Head module can rotate 90° to avoid the "big puncture"
- Head module can be removed in 5 seconds when not in use.

Select 4, 3 or 2 bike carrying capacity

Select 1.25 or 2 inch base

Practical foot Pedal tilt feature

New Head designed to fit convoluted bike frame shapes

MODULAR BIKE HITCH SYSTEM

#	DESCRIPTION / CAPACITY	PART NO.	PRICE USD

The Final Distinctive Touch Your LLTEK badging displays the proud touch of distinction to show your car is different from all others. Each badge sends a clear message: you care about your car, your upgrades and the final distinctive touch. Badges are shown actual size (except for paper shrinkage). Actual Windshield banner size is 55 x 8.5 in.

3D Domed Resin Casting System Except for front grill badges which use twin mounting pins, all badges use a tacky self-stick adhesive. Each raised and domed emblem provides a superior visual effect achieved with the use of top quality materials via high tech manufacturing techniques. Every emblem is UV stable for long life.

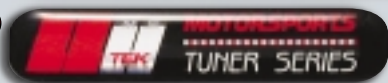

Domed for life - Polyol.T + Catalyst Your badge emblem generally starts with a base layer of vinyl polyester followed by chrome foils (see illustration). Several layers of colored silk-screened inks are carefully applied to the foil as the badge design is built. Finally a semi-soft coating of polyurethane is poured into the badge mold to create a raised protective layer with full UV properties. Average thickness is 2-3mm.

LLTEK
TUNER SERIES

All tips are manufactured with 304 stainless steel for long life. No welding required. Just slide on and tighten with the provided Allen tool. Tuner Series tips are Audi specific and may be too large for other cars. Many Audi cars require two tips for a complete installation. Measurements provided show Audi exhaust dimensions plus "Tuner Series" tip dimensions. Tips come with Tuner Series logo in raised urethane which can be removed at time of installation. Tips have variable length adjustment allowing protrusion length to be owner set. This flexibility is very helpful when combined with a new rear valance. All tips are moderately angled design. Exhaust collars fit North American Audi cars only. Dimension subject to fractional adjustment.

Prices in US dollars; specifications, availability and pricing subject to change.

(1) Comes painted in RS silver, match paint is an option. (2) 2.8/2.7T 1998-2000 only-no backup sensors. (3) Most configurations require two tips.

Normal extension

Slightly outward

Maximum extension

A6 TIPS: Tips priced individually. A6 tips for facelift model only. For A6 pre-facelift and early A6 4.2, it is relatively easy to create a through valance look. Cut downward facing tips and leave maximum stub length. Minor bumper surgery required. Clamp on pipe to stub. Adjust tip length accordingly. Order (2) part UH4B-03K for black edge trim. For A6 1998-2000 with no back-up sensors you can order the full exhaust trim, part UH4B-04K/05K at \$66 for the set. Paint is optional at \$55 per set.

A4 Dual or Quad lower rear valance (refer to page 116)

Quad frame

Dual frame

Turbocharger Replacement: KO3 and KO4

- All product is OEM KKKO3 or KKKO4
- Availability not guaranteed
- Customer must specify the correct model/VIN
- Non-returnable product (special order)
- All units are new, not rebuilds
- Race only KO04 Blueprint
- All model years are North American unless "All Years"

The big BRA: reasons to buy an LLTEK supplied BRA to protect your car from bugs, road debris and even stone dings.

- Heavy duty 25 oz vinyl (100% virgin) with exclusive memory fit for snug body fitting in all climates. The industry's heaviest for maximum protection. Fits unmodified front ends only (USA/Canada specification).
- Vinyl top coat has a UV coating to reduce aging and cracking due to ultra-violet sunlight.
- Vinyl backing is extra soft flannel, porous and extra thick to keep paint scratch free and allows trapped moisture to escape.
- Attachment components are double covered and reinforced. "S" hooks are coated with soft, pliable vinyl. These "extras" eliminate metal working through material into paint and assure superior protection against abrasion.
- Binding of all edges and openings is "felt" for optimal protection and a professional look.
- Stitching is top/double for a hand tailored fit and maximum strength.
- Fender sections contain double padding at critical areas to prevent wear through and protect finish.
- Instructions for the "initial set-up installation" are first class and guarantee fast and easy "on/off".

Note: All bras for Audi, Porsche Cayenne® and VW® Touareg® cars are 2 piece (separate lower hood and bottom section) fit without license plates, have headlight washer openings, plus protective screening over upper grill. All models have air foils except TT. Bra may not fit properly when installed over aftermarket add-ons or facelift.

22	Upgrade from black vinyl to carbon fiber look•Specify CF code				
				Add \$	33

IMPORTANT BRA OPTIONS: All models in stock have no opening for front license plates. To order a model with license plate opening, at no extra charge, ask for code 1. All models are sold with black vinyl material. To order the new carbon fiber look material (see insert picture), ask for code + (plus) and add \$33 to the price. Specifications, availability and pricing subject to change. Although breathable vinyl material is used, DO NOT leave BRA on car for extended periods when wet. 12300714-9660575

Coilpack problems
Call LLTEK

If your car is out of warranty, if your coil-pack fails or if you are looking for superior coilpack performance, call LLTEK! LLTEK will soon offer 4, 6, 8 and 12 cylinder coilpack performance kits at a very competitive price that will exceed OEM specifications. At the time of publication, prices, availability and specifications were to be confirmed. Actual color and product design may differ from picture. Gain power, save some money!

K&N "FREE FLOW" Panel

K&N is the recognized leader in replacement "low restriction and free flow" drop-in reusable panel filters. This installation and upgrade takes only moments allowing extra air to the throttle body to create a 5-7 HP gain in horsepower while maintaining superior air/dust management. The unique pleated cotton grid traps dirt on the filter surface without impeding air flow. Note: your car will sound a little sportier as air is quickly sucked over the mass airflow sensor into the intake runner of your motor. Order the optional cleaning kit to re-oil the filter surface and extend the life of this reusable filter.

Video Camera Mount

Catch all the action with this precisely engineered and unique product. This is no plastic "cheapie". Instead you receive an adjustable and precision CNC machined aluminum arm weighing under 2.5 pounds (1 Kg) (excluding camera). The precision ballhead can support a video camera up to 8 pounds (3.2 Kg). The clever design of the sliding mount allows a fit on virtually all double post headrests. All hardware is stainless steel ensuring durability.

TYPE	PART NO	PRICE
VCAM.M	ASP00-01	\$199

KEY FEATURES:

- Adjustable for 360° panoramic view
- Installs in two minutes
- No modifications needed
- Reverse mount feature allows use on driver's or passenger's headrest
- Supports a camera of up to 8 pounds
- For 10 mm posts: adjustment is 4 to 6.5 inches
- For 14mm posts: adjustment is 5.5 to 8 inches
