SHOWCASING SIGNATURE SERIES

RSR

The RSR for Audi A4(B5) The RSR look from UBERHAUS of Europe has arrived. The design was tuned and developed to LLTEK specifications. The final look is based on discussions and interviews with hundreds of Audi A4 (B5) enthusiasts, most particularly S4 owners. The close cooperation from UBERHAUS has resulted in big dividends for the purchaser of this new 4 piece styling kit. Each key styling feature is highlighted, noted and explained.

Probably the **most important feature** is the material the product is made of. PURIM (Poly Urethane Reinforced Injected Molding), is a semi-flexible, semi-hard material that all major manufacturers use in their OEM (original equipment manufacturer) bumpers. Therefore a small pressure tap (read smack) should do no serious damage to the bumper, thus ensuring long life. Without question, PURIM is the material of choice for front bumpers.

The **second most important feature** is a "styling methodology" to allow the Audi enthusiast to participate in the final look of the car. This individual custom program is handed to the customer to produce the final styling decisions. So, for the first time, a customer can tune functionality, look and styling of both front and rear bumpers. Top quality materials, individuality and an affordable price makes the UBERHAUS Signature Series RSR design the serious contender in the A4 (B5) styling category.

CAUTION
ALWAYS SEE PAGE 7

SIGNATURE FEATURES

- **PURIM Flex material (front only)**
- **Affordable price**
- **No license plate indentation**
- **New side louver design**
- **Leading edge lip spoilers**
- **Oversize intake openings**
- **Brake ram air option**
- **Splitter material options**
- **Mesh grill options**
- **Carbon fiber accents**
- **Diffusers options front/rear**
- **Intercooler friendly**

Large mesh without splitter option

**Louver
Mesh
included**

Intercooler friendly with generous space

SIGNATURE FEATURES

Purim material The front bumper is made in a semi flexible, semi-hard material allowing for minor taps with no serious damage. Purim is a first from any manufacturer in the A4 category.

Affordable price The UBERHAUS A4/S4 bumper is responsibly priced. Molds for Purim are very costly and complex compared to ABS, composite or fiberglass.

FRONT BUMPER UNIQUE FEATURES*

No license plate indentation LLTEK customers requested the deletion of the front plate indentation in order to achieve a clean unbroken line and look. Request granted! A North American plate can be installed if needed via surface mount.

Headlight washer openings Most Audi enthusiasts have told us they prefer the smooth look of no caps. For those who want a washer system, a small hole is easily drilled at time of installation to allow the use of the factory caps and washer systems.

New side louver design UBERHAUS reworked and updated the design of the air louvers to develop a prominent styling feature. Now the leading edge sits outboard and the louvers no longer look like an afterthought cut into the inside of the bumper.

Louvers are more detailed and the design is a more thought-out styling approach. As an option, the louvers can be painted an alternate color (usually Titanium Silver or RSRS silver) to create a further styling highlight.

Leading edge lip spoilers Integrated into the bumper design at the lower left and right corners are two perfectly balanced and sized edge lip spoilers. These lips become a styling feature plus create a more purposeful and aggressive look to the front bumper. Down force is assured for the first time. As an option, the edge lips can be painted an alternate color (usually Titanium Silver or RSRS silver) to create a further styling highlight.

Larger intake openings UBERHAUS has reworked and redesigned the 3 traditional oversized main air intakes by more sharply defining the openings. This creates a more masculine and aggressive look with edges which are flatter and wider. Extra space has been provided for larger intercooler systems.

Two Mesh Style options When you purchase the UBERHAUS front bumper, you can choose between two optional mesh styles. Choose the larger (cross hatch) pattern for the RS4 factory look or the tighter "expanded mesh" made popular on Audi's famous RS2 track car.

Note 1: The internal design of this unique front bumper allows for use on the European specification A4.

Note 2: The RSR is intercooler friendly with generous interior space and can be edge trimmed for even more space.

Note 3: This bumper fits the USA/Canada and Euro S4 cars.

REAR VALANCE • CALL FOR DETAILS

LLTEK customers wanted a design that was more thought out. The word "Ferrari" was mentioned often and LLTEK transmitted this information to UBERHAUS who came up with a superb rear bumper lower valance design. Once again, UBERHAUS design teams created options allowing the Audi enthusiast to further control the styling effect.

Two mesh style options You can choose either the "cross hatch" or "expanded mesh" options with pre-installation and paint as further option.

Carbon fiber styling overlay UBERHAUS devised a styling option which truly reinforces the Ferrari style and look. Order this item with your bumper or at a later date and just glue into place.

Carbon fiber lower diffuser Should you elect to order the carbon fiber styling overlay you can also

COMING SOON!
Full width carbon fiber front and rear splitters \$288 ea.

order the lower carbon fiber diffuser. This piece attaches below the overlay creating four distinct openings with a curved diffuser edge. It's the best of personalization and it's up to you.

Side skirts perfection UBERHAUS knew the Audi enthusiast community was looking for a more natural and integrated side sill look and they came up with their great design. At the top edge there is a small box style protrusion similar to the factory RS4. However, leading and trailing ends were fully sculptured and enlarged to create a more flowing yet integrated look with the front bumper and rear valance.

Other items found on the RSR feature car are:
8 piece vinyl edge trim kit When you remove the black lower door trim to create a mono chromatic color scheme, you are greeted with a nasty surprise. Numerous holes become visible and a few protruding pins must be cut off. To avoid hole filling and an expensive full door repaint, simply order the LLTEK 8 piece painted molding kit. This is an inexpensive "peel and stick" solution. The cost of this painted kit is discounted when you order (ATP/at time of purchase) other matching painted product.

Sport grill Type RSR.5 New to LLTEK is the uniquely styled front grill upgrade in black with no

latch access hole. The Type RSR.5 grill will complement any Audi A4/S4, with or without aero styling. Transfer your Audi rings (not included) to complete the look if you wish. LLTEK's badge is included.

Hagus Sport Mirrors LLTEK is the North American importer for Hagus mirrors for Audi product. These "Made in Germany" twin stock mirrors are "plug and play", full remote electronic and anti-fog with its heating element. No special wiring is needed. The big benefit is the ultra-wide angle mirror with blue tint anti glare glass for ultra wide area coverage.

Projector headlight upgrade/eyebrows Our Pelican blue feature car is a 1997 1.8T A4 with the LLTEK projection headlight upgrade which literally transforms, updates and upgrades your car's look and lighting. It's the two piece perfect fit "plug and play" installation available in true HID (Phillips) or Halogen H7. Visibility is dramatically improved and the painted headlight accents complete the look.

Real carbon fiber for B & C pillars This car has the LLTEK 4 piece real carbon fiber kit installed between the front doors and on the corner quarter panels. It is a "peel and stick" application.

RSR carbon fiber styled trunk spoiler, LLTEK went to Kerscher to develop a unique rear

trunk spoiler for the new RSR. Two unique side pods securely hold a real carbon fiber wing span. The end result is a technical display of styling and design. Fits A4 and S4 cars.

Upper roof window spoiler Zender of Germany has always been a leading design stylist for Audi. Their upper roof wing glues into place and is the superior styling product in its class. This small part completes "the look". Rieger of Germany also makes a similar product with a strong bold look as well and at a lower cost.

Optional front in bumper lighting LLTEK can provide you with a choice of true HID Xenon driving lights or a set of Halogen ultra high performance driving or fog lights. Either option makes a dramatic lighting improvement with the amazing HID system overpowering the HID headlight system. Options are priced low with free installation when the bumper is ordered.

Wheel and tire program The wheels chosen for the UBERHAUS A4 project car are LLTEK's lightweight RK utilizing Pirelli performance tires. These 18 x 8 inch wheels are both beautiful and affordable as are all of the wheels in the LLTEK program.

1. Full front bumper replacement: For A4/S4. New outboard louver design. Twin corner lips, optional center air diverter, optional brake duct box. No Euro license plate indentation. Manufactured in Purim just like OEM. Intercooler friendly

2. Two air splitter materials: Choose real carbon fiber or composite material. Both products divert air to general brake area and look fantastic. Easy bolt on/easy off for optional use.

3. RSR RAM air brake box: Used with either air splitter products. This add-on hidden box channel delivers extra air to wheel well and general brake area to assist brake cooling.

4. Two mesh styles, 2 mesh finishes: Choice of large RS4 "open" style mesh in black or natural silver. Alternatively, "tight" weave black or silver mesh in traditional RS2 pattern. Optionally fitted, molded and siliconed into place.

5. Accent second color paint: Available as a low cost option is a second paint color for side louvers and twin lip spoilers. LLTEK master painters are always ready to serve.

6. Driving lights in HID or Halogen: Installation is free when ordering bumper. Choose ultra hi-performance Xenon HID or new generation Halogen lamps. Refer to lighting section for details.

7. RSR.5 sport grill: Premium design RSR grill. Also available are grills from Caractere and Kamei. Look! No center hole. Hidden release lever provided. See A4B5 grill section on page 78.

10. Performance wheel models: The RK wheels on the Pelican Blue car are 18 x 8. Examine the entire LLTEK wheel selection to view great product and great prices. Certain models use the DHBP system for installation on either 5x100 or 5x115 cars.

13. Hagus sport mirrors: Great looks, increased safety from this German made mirror company (OEM for TT). Wide view and blue tint lens. "Plug and Play". Match paint option. See mirror section for details. European specification mirror reflection.

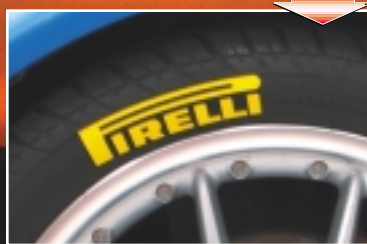

8. Headlight accent treatment: Several styles available. With the purchase of 2 piece clear HID/HAL versions, the accent shown above is half price. Also available are 2 full headlight masks. Paint option available.

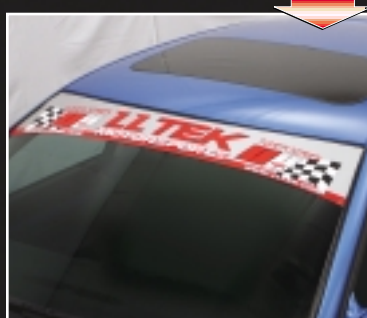

9. Full projector headlight upgrade: Euro 2 piece S4 headlamp for facelift and Euro 1 piece headlamp for facelift. "Plug and play". Dramatically improves visibility and safety. OEM Phillips HID or OEM Valeo or Halogen models. Special bulb offers. Refer to "lighting" for details.

11. Performance tires: A top performing tire makes all the difference in the world. LLTEK can supply Pirelli high performance tires. Ask for a free tire quotation.

12. Racing windshield banner: The LLTEK banner fits the front and rear windows of the A4 B5/B6, A6 and TT cars. "Don't leave home without it". Silk screened on silver background. High quality and UV resistant.

14. B and C real carbon kit: Cover your B and C pillars with real carbon fiber for the high tech carbon fiber look. Peel and stick application.

15. 8-piece vinyl molding kit: Let LLTEK save you money when you remove your lower OEM door molding revealing holes and pins. No need to fill and paint. Just peel and stick the 8 painted vinyl pieces for the instant mono-chromatic look with side skirts. First you snip off the pins.

1.888.GO LL TEK

LLTEK Motorsports is not affiliated with Audi AG nor Audi of America nor Porsche AG nor Porsche Cars North America Inc. nor Volkswagen AG nor Volkswagen of America Inc. in any way.

16. RSR side skirts: All new design based on RS4 with small table platform. Contoured and easy to install. These pieces make all the difference and visually make the car more masculine. Add 8-piece molding kit to save money.

17. Upper roof spoiler: Glue on the stylish Zender upper roof spoiler for an ultra clean look. Alternatively Rieger offers a version as well. Paint option available. See spoiler section for details.

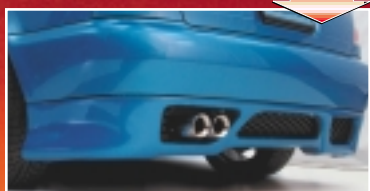

18. Carbon fiber trunk spoiler: It's big, it is a real carbon fiber span and it's ultra tech. However, there are 8 other models to look at. Styles range from mini conservative to full touring car race look. Code named KTRSR.C.5.

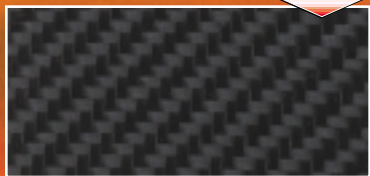

19. Altezza tail lights: Our newest tail light design based on the Ferrari car and named after the town of Altezza in Italy. Also available in all clear or all smoke. See lighting section. European lighting specification.

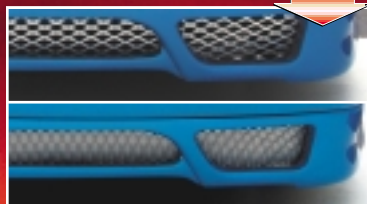

20. RSR lower rear valance: Fits the North American A4/S4 B5 (Euro model to follow). New Ferrari look. This valance fits like a glove and follows the correct contour and curve of the USA wheel well. See available mesh styles.

Note: Real carbon fiber. Real means genuine. Genuine means real. LLTEK carbon fiber is the true space-age lightweight super strong product. Grain and weave pattern is always random. Black and silver.

21. Two mesh styles, 2 mesh finishes: Choice of large RS4 "open" mesh in black or silver. Alternatively, "tight" weave black or silver mesh in traditional RS2 pattern. Optionally fitted, molded and silicone into place.

22. Real carbon fiber accent center: This real carbon fiber accent overlay is a technically styled product and highlights the Ferrari look. Participate in the design of your RSR rear bumper. Order with your rear valance or at a later date.

23. Real carbon fiber lower diffuser: This lower carbon fiber diffuser attaches below the carbon fiber center section to create the ultimate in technical design. Creates 4 separate air channels to further stylize and accent the rear.

24. Stainless steel performance exhaust (B5): LLTEK has them all (FWD and Quattro), 1.8T, 2.8 and 2.7T with or without downpipe. Great performance upgrade. Deep throaty sound. Be heard, not overheard! Our exhaust systems are not excessively loud.
