Five sport grill upgrades!

FREE LLTEK framed grill badge.

A. KAMEI HEX KHSG.5

B. KAMEI MESH KMSG.5

Flush surface fit. All metal. Powder coated black. Easy ten minute installation. Audi rings, large or small, may be glued into place (rings not included).

C. CARACTERE TYPE CMSG.5 3D

Black 3D recessed black ABS outer frame (optional frame paint recommended in match or contrasting color). Original Audi rings (not included) re-installs to a special mounting plate. LLTEK badge included.

D. UBERHAUS USGH.5

Technically styled in high impact black ABS automotive plastic with near circular opening grill pattern. Audi factory rings (not included) re-fasten to mounting plate. LLTEK badge included.

E. UBERHAUS USGX.5

Badgeless RS4-look grill in black chip resistant PURIM. NEW tech: No center hole, new hood release actuator included. Audi rings (not included) may be glued into place. LLTEK badge included.

Also see Special 50% Discount with RSR bumper purchase

A4 lower makeover

There are several simple functional and styling treatments available. Each produces stunning results and creates clean technical styling. All components come with black mesh, a perfect match for a Kamei KMSG.5 or CARACTERE CMSG.5 mesh sport grills. Also looks and works equally great with other front grills, even the Audi factory front grill.

F. TYPE VTG.5: Center replacement lower grill upgrade. For A4(B5) cars (not S4). Requires minor removal of factory plastic supports. Black mesh included. ABS frame in black (match paint available). Allows more air intake for superior cooling. A very stylish frontal upgrade.

G. TYPE UAB.5: Replacement bezel for OEM factory fog bezel. Match paint available. A very clean upgrade for A4 cars equipped with lower factory fog lamps. Allows extra air for intercooler and brake cooling. Black mesh included. Easy installation. Complements and matches perfectly the VTG.5 center air intake.

H. TYPE VTF.5: Fog light upgrade kit. For early A4(B5) cars without OEM corner fog lamps. A special connector facilitates easy connection to OEM fog wiring harness allowing use of factory stalk. Kit includes two high performance Hella lamps. Easy installation with custom brackets and supports made for the A4(B5).

Additional data: see lighting section

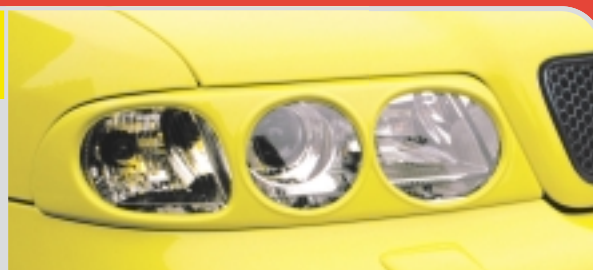

NOTE: Bezel UAB.5 and VTF.5 are not interchangeable.

Headlight masks A4/S4 one-piece

TYPE MSHL.5 • TYPE UHL.5

Both mask types are superb styling upgrades. ABS automotive grade plastic. Match paint available. Designed for one-piece projector headlamp in HID or Halogen. May be used with two-piece headlamp with loose corner connection. Covers 90% of yellow corner reflector. Glue on installation (two-way automotive grade double face tape possible for secondary method of attachment). Adhesive supplied.

TYPE MSHL.5 (above)

TYPE UHL.5 (below)

Taillight masks for A4/S4

TYPE UTMO.5 • UTMN.5 • UTMF.5 • UTA.5

A superb taillight enhancement. Automotive grade ABS plastic. Match paint available. Glue on (possible 3M® 2-way tape installation). This is a great product to complete the overall custom look of any A4/S4. Generally, UTMO.5 is for early sedans. The UTMN.5 is generally for mid-range years and UTMF.5 is for facelift sedans. Visually verify the lens design on your car to ensure correct model purchase.

TYPE UTA.5 Avant all years

TYPE UTMO.5 (1996-97)

TYPE UTMN.5 (1998-99)

TYPE UTMF.5 (1999.5-2001)

Eyebrows

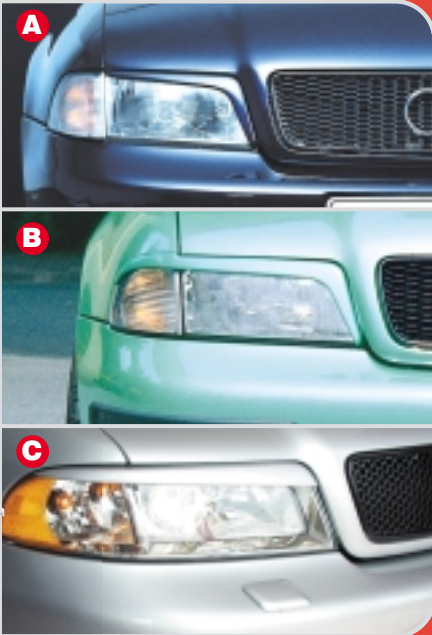

Truly a neat little upgrade (match paint available). Enhances headlight while creating a sleek frontal design.

A. TYPE EBS(2P).5* Short version • For 2-piece OEM or projector headlight.

B. TYPE EBL(2P).5 Long version • For 2-piece OEM or projector headlight.

C. TYPE EBL(1P).5 • For 1-piece OEM headlight.

* **See 50% discount** with purchase of 2-piece Krystal Klear Euro Projector headlight set or RSR bumper

Air scoops

Technical 1.8T upgrade forcing compressed air (moisture reduced) directly towards intercooler. Also good for 2.8, for brake cooling. Requires minor modification to OEM bumper. Mesh included. Match paint available

Carbon fiber 4-piece kit (B&C)

A4/S4 sedan. Genuine carbon fiber exterior kit. Covers B-pillar (between front and rear windows). Covers C-pillar (small triangular area at corner of rear door window). A technical upgrade. Just peel and stick. Two LLTEK badges included (design may vary).

Exhaust tips/frames

EXHAUST TIPS: Slide-on highly polished stainless shell tip for 1.8T and 2.8. Adjustable fit length. Just tighten bolts and go. Enhances rear of OEM bumper or aftermarket rear lower valance. Each tip sold individually. 2 tips needed. Each tip supplied with a removable Tuner Series tip badge.

EXHAUST FRAMES (North American OEM fit only)

Prepainted graphite silver

TYPE UEF.5 • All A4 B5 models

TYPE UEF.S4 • All S4 B5 models

TYPE UEF.5 for add-on tips or full exhaust

TYPE UEF.S4.5 exhaust frame on S4

Mirror Upgrades • HAGUS

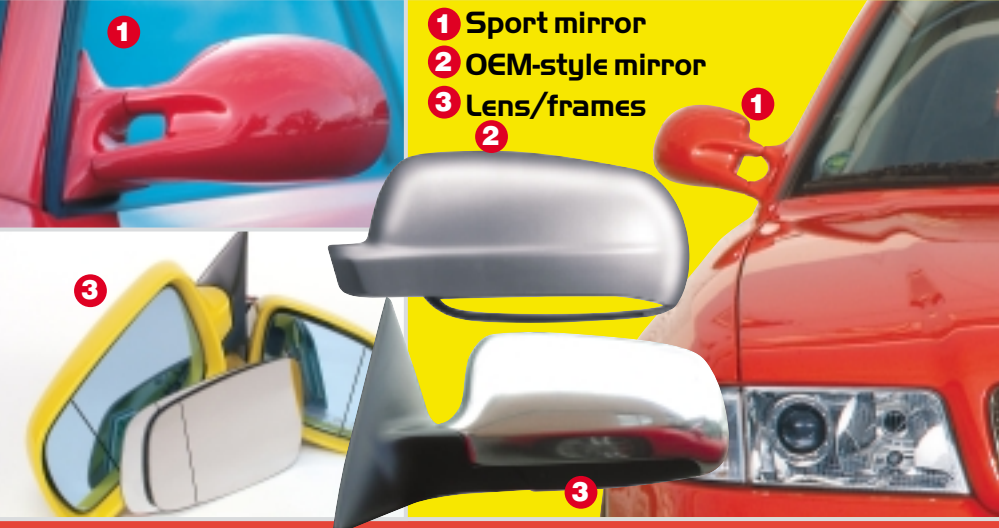

All LLTEK supplied mirror upgrades are manufactured by Hagus of Germany.

LLTEK has a broad range of mirror upgrades starting with the Hagus dual-stalk upgrade set (match paint available). This is "plug and play" installation allowing for full mirror movement plus retains the anti-fog function and heat. The Sport mirror provides an extremely wide angle view allowing the driver to virtually see behind the car. Alternatively, the driver may adjust the mirrors to virtually eliminate blind spots.

OEM replacement mirrors, frames and lens are also available. For further details, refer to the HAGUS mirror page.

Note: Sport mirrors utilize an anti reflective blue lens in aspherical design to create the extra wide angle coverage. Also features anti-dazzle properties.

Complete mirror details on pages 34-37

Dash upgrade kits

See page 32 for complete dash kit information

As an Audi driver, you spend many hours in the cockpit of your car. Why not upgrade the interior with genuine carbon fiber, carbon kevlar or woodstyle. Create your own distinct and stylish driving environment for yourself and your friends. Refer to the complete section on dash upgrades for specifications, pricing and details. Examine the sheet pattern in this catalog for proper dash configuration identification.

NOTE: Color printing can never properly convey true color tones. Talk to your LLTEK representative about colors, model and components. Dash kit surfaces are covered with protective hi-gloss automotive grade urethane. Installation is stick-on via 3M® two-way tape already pre-installed on every piece. Professional installation recommended.

High end wood style lends a glorious luxury effect on any A4 interior

NOTE: A4 B5 console designs come in three configurations. Use the "pattern section" to correctly identify the version you require.

Match Paint (MP)

Short shift upgrade A4 / S4

Reduce shift lever throw and eliminate long and imprecise OEM lever travel. Precisely engineered kit from B&M includes all the necessary hardware and lubricants. This upgrade will provide hours of increased driver enjoyment.

© 2000 Luis Aguayo

Shift knobs upgrades

The tactile contact between driver and car starts with the shiftknob and LLTEK provides plenty of exciting upgrade options. Models A thru F, Dimpled chrome upper, single "O" friction ring with leather covering (except F). A Yellow, B Red, C Blue, D Grey, E Anthracite black, F Matching chrome lower.

Winner Series: models I thru 6

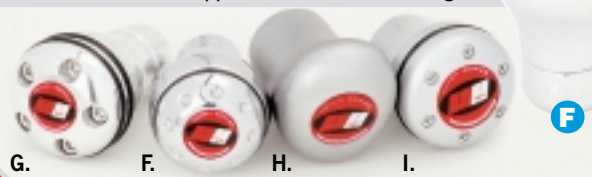

Metallic shift knobs

G. TYPE RACE: Polished metal upper with precision machined screws. Double "O" friction rings. Polished lower. Heavy grade alloy material, slightly oversized.

H. TYPE S: Surface in brushed aluminum (matches aluminum center console upgrade kit, see details on following pages).

I. TYPE RS: Surface in polished metal with single "O" friction ring.

Models A-F utilizes 3 retaining screws, models H-I are twist-on. All models supplied with LLTEK center logo.

Shiftgate frames

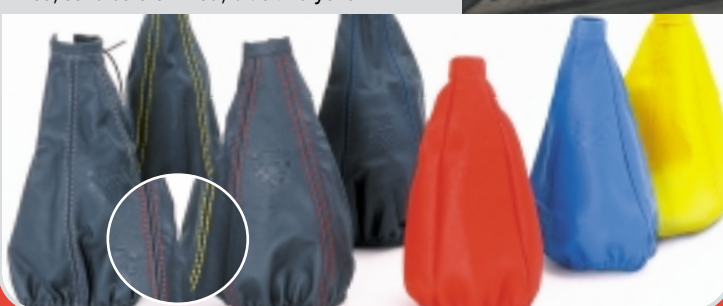

Hi-gloss polished metal shiftgate frames. Certain models have detente slots. For earlier generation A4 models (96-99 only). Also available, stylish "Copriasta Cromato" aka "chromed gear lever frame" to create the truly personalized touch.

Leather shift boots

Genuine Italian designed anthracite black leather shift boot with specialized color double-row stitching. Stitching colors available in red, yellow, blue and grey.

Also, solid colors in red, blue and yellow.

Sport pedal sets / matching deadpedal

LLTEK provides only high quality pedal sets all manufactured in Germany. Sport pedal set upgrades create a true custom look and improves tactile feedback. All sets are application specific for Audi cars only and are not universal. All sets come with raised friction rubber beads. Manufacturer logo debossed.

Important notice: Starting in 1999.5 USA/1999 Euro (the facelift), Audi switched to "drive by wire" (DBW) technology. As a result, pedal design was radically altered. Be sure to specify if your car is before or after the facelift. Deadpedal design is also application specific and sold separately.

Manufacturer	Before facelift	Facelift (DBW)*	Surface finish	Manual	Tip/auto	Footrest (Deadpedal)
ZENDER	no	yes	Brushed aluminum	yes	yes	no
JE DESIGN	yes	yes	Hi-gloss chrome	yes	yes	Facelift only
TUNER SERIES	yes	yes	Polished satin	yes	yes	yes

* DBW: Drive By Wire

Cellphone base solution / DIN radio spacers

Today's lifestyle demands instant communication. Audi drivers take their needs seriously and insist on managing their cellphone communication needs. LLTEK has 2 solutions:

A. Leather cellphone base: This custom unit fastens to the side of the A4 center console providing a flat stable platform. Simply use the manufacturer's cellphone cradle or magnetic button to secure the phone.

1. 1996-1999 (93260) 2. 1999.5-2001 (93270)

B. Metal cell bracket: This unit attaches behind the radio and provide a suitable platform to attach the manufacturer's cell cradle (for early A4).

3. 1996-1997 (PAN0001)

4. 1998-1999 (PAN0002)

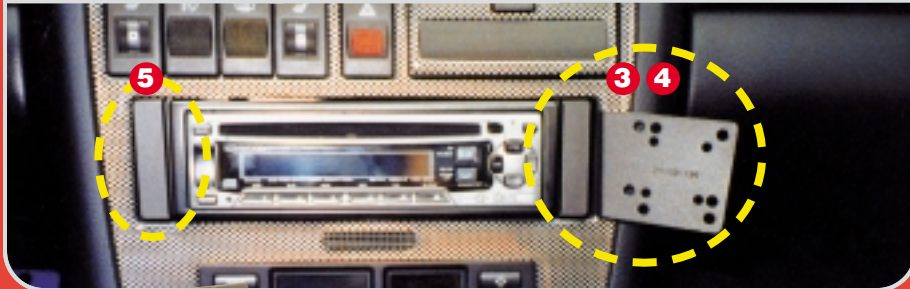

C. DIN radio spacers (1996-1999): If you own an earlier A4 and wish a DIN radio upgrade, you will need these little end spacers to properly fill the gaps. These black plastic spacers (photo 4 below) were specifically designed to cleanly allow for the upgrade (requires partial radio removal).

5. AU0001

Note: The metal cell bracket and DIN spacer can both be installed; however only 1 of 2 bolts can be utilized.

VELCRO® DISCS INCLUDED with holder

Elegance in brushed Aluminum

For those cars without a wood interior, consider a German-made genuine aluminum center console kit with optional aluminum shift surround. This easy-to-install kit upgrades the cockpit and transforms your Audi's environment into a highly technical control center. Your upgrade will be appreciated day after day after day! If your car has a manual transmission, consider specifying the matching brushed aluminum ergonomically designed TYPE S shiftknob (H).

A.For 1996-98

B.For 1999.5 only

C.For 2000-01(also S4)

REAL ALUMINUM

NOTE: version C also fits the S4 model

Turbo Timer (HUD)

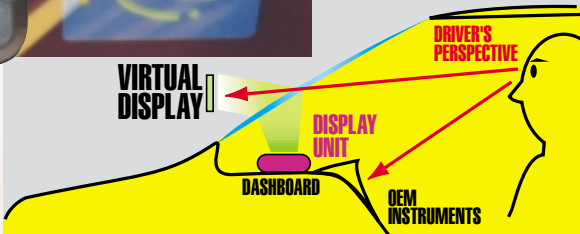

This is the critically acclaimed Heads-Up Display (HUD) for a turbo timer and boost gauge display. No questions asked! This is a neat and amazing accessory for Audi (or any 12 volt) turbo charged car. The HUD works by projecting a blue/green (no red available at this time) display on to the corner of the window, just like jet fighter technology. A see-through small piece of plastic adheres to the windshield to allow for optimum reflection. Display is in digital plus a circular bar graph. There is a "peak hold" mode and user controllable "over-boost" alarm mode.

Turbo Timer Notes: Of course, the key feature is the turbo timer. The HUD device computes how hard and how hot the car motor is and will adjust the countdown time accordingly because it is always monitoring boost. For lighter running, the countdown is short. For longer running the time is extended. Manual time-out settings are user selectable.

Not "Plug and Play". LLTEK wants you to know that while this is an amazing device, it is not a cakewalk installation. Installation is by professionals only. Splicing into wires and familiarity with wiring harness is critical. This is a sophisticated electronic product. If your car has a complicated alarm system, this product may not be for you. Some electric door lock functionality may have to be performed manually once the device has been activated. Different models of Audi cars may present different installation issues. The product comes with detailed general instructions from the manufacturer. This is a non-returnable product.

Feature set: Display unit • Reflective see-through smoked plastic • HUD projector • Boost transducer • Turbo timer • Control unit • Wiring harness • Various connectors, miscellaneous parts • Manufacturer's instructions • (HUD illumination in blue/green).

Advanced Jet Fighter Technology!

All season trunk liner • A4/S4

Imported directly from Germany, the protective tough plastic trunk liner is a worthwhile investment. High sides control soiling of the factory carpet beneath. Edges are flexible allowing oversize cargo (skis, bikes, surfboards, golf bags, etc.). The center section is "anti-slip" to prevent excessive cargo movement. To clean, simply remove and hose down. Now when you toss in dirty boots, grungy cans of paint or a muddy mountain bike, you will have full protection and security. Fits FWD A4B5 sedan and Avant only. Quattro version shortly.

Note: Trunk liner corners are designed with cut-outs to access D-rings.

A4 B5 NOTE: Trunkliner may not fit properly with Audi installed integrated CD changer mounted on the left side.

Anti-slip center section prevent excessive cargo movement

All season M&S floor mat system • A4/S4 (B5)

Originally M & S stood for "Mud and Snow". However, these European designed mats are so attractive and so functional we consistently ship sets to Florida and Arizona! The mats for the A4(B5) are designed specifically to fit extra tight in the floorpan.

Each front mat is oversized with elevated protective edges on the outside to better control water, mud, dirt or snow. The inside edge is raised and rides several extra inches up the side of the transmission console.

Utilizing synthetic tight weave low-pile industrial grade carpet, the surface pile is designed to quickly wick moisture away. A thick heavy-duty driver heel pad is electronically bonded to the upper carpet surface for extra protection and long life. The easy to clean (just hose down and brush) carpet surface is bonded to a hi-tech flexible plastic tray ensuring no penetration of material and creates perfect protection for the OEM carpet beneath.

1996-2001**

Cargo net system: 3 easy to use nets

One of the best purchases one can make is the cargo net system. Audi provides only the trunk mounted D rings. However LLTEK provides 3 cargo net trunk solutions. These important nets properly control cargo movement. LLTEK provides at eye level, an inner trunk mounted net to provide lightweight storage of gloves, jackets, hats, etc. Inside the passenger compartment, the second cargo net attaches to the transmission tunnel providing extra and flexible easy to reach storage. Finally, the third net attaches to the 4 D-rings on the trunk floor.

Secure and convenient storage.

Woven flat mats • A4/S4 4-piece set

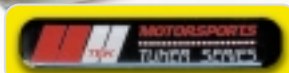

A great interior upgrade utilizing the traditional racing colors of Audi. Outer edges are ribbed with a fine silver/gray colored material. The electronically glued reinforced heel pad is embroidered with a red ribbed edge. LLTEK emblem on board (front only)! This is a very handsome looking set complementing any A4/S4 interior. Carpet pile is tight for easy cleaning. Carpet surface available in Ebony Black only.

BLACK ONLY

Brushed threshold door sills - 6-piece set for A4 (B5)

For earlier Audi A4 cars, this 6-piece threshold set provides a true custom upgrade. Originally designed as a 4-piece kit, LLTEK specified 2 extra inside edge pieces for the front doors. Each interior piece comes with its own Tuner Series domed urethane emblem. Very easy installation with convenient 3M® automotive grade two-way tape.

2 Domed urethane badges included

© 2000 Luis Aguayo

Identity Protectors (Photo Flash and The Confuser)

In the "we could not resist" department, LLTEK presents 2 different approaches to identity protection. LLTEK wants all drivers to respect the law, observe posted speed limits and to drive safely with consideration to others. LLTEK also believes you should have a choice of preserving your identity if you are photographed without authorization.

1. PHOTO FLASH RADAR FLUID This unique product must be sprayed on weekly for effective results. Its secret "rare earth element" formula prevents unauthorized flash photography of the plate. This is of great interest to drivers throughout the world, where photo radar is used to ticket vehicle owners electronically via the mail. This is total stealth!

FAQ about PHOTO FLASH RADAR FLUID:

Q. What is "The Spray"?

A. This amazing new product stops photo radar from taking pictures of your license plate. Simply spray Photo Flash Radar Deflector Fluid on your license plate and render your car immune to photo radar technology!

Q. How does "The Spray" work?

A. Photo Flash Radar Deflector Fluid contains rare earth polymers that enhance and reflect the light from a photo radar camera flash back to the lens! This reflected light will overexpose your license plate making it unreadable in flash photographs.

Q. Is "The Spray" legal?

A. Yes! Photo Flash Radar Deflector Fluid dries completely clear and does not obstruct your license plate in any way. The treatment is totally invisible to the naked eye, so nobody knows you are using it.

Q. How long does "The Spray" Last?

A. The spray is invisible so you cannot see it wear off. However the polymers dissipate in approximately 6-7 days so a once-a-week spray is recommended. Each 4 oz. bottle (120mL) should last approximately 5 months if used weekly based on one plate.

2. THE CONFUSER Introducing a 4th generation clear plastic lens capable of denying photo radar your identity. Viewed straight on, your numerals looks perfectly normal. Viewed at height or at off axis angle, all numerals are in full reflective mode rendering the plate undecipherable. Now available in European sizes.

Deny "photo radar" with the CONFUSER! AVAILABLE IN SEVERAL SIZES for North American and most European license plate sizes. Get yours today!

EURO 3

EURO 4

Car covers

Our car covers are custom fitted. Choose TYPE CCE.5 for true heavy duty outdoor, UV and moisture protection with 4 breathable layers or TYPE CCS.5 for a lightweight 2 layered occasional dust and sun protection.

A4 Bra and Mirror covers (P.44)

To protect the front end of your car, you can order the front A4 BRA and optional companion Mirror covers. These two products are ideal for trips on winding back roads where gravel is loose or prolonged freeway drives. Bras should be removed if there is extended periods of moisture. Bras will not fit correctly on cars that have modified fronts. Details are available in the General section of this catalog.

NEW! All BRAs available in optional carbon-look material

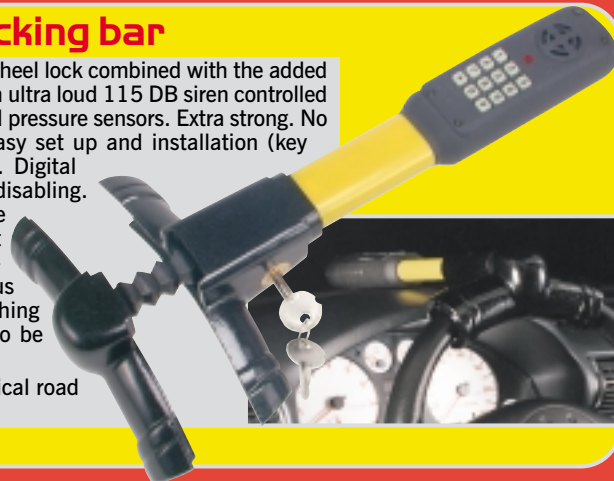

Steering locking bar

Easy to use steering wheel lock combined with the added security of a high pitch ultra loud 115 DB siren controlled by internal motion and pressure sensors. Extra strong. No key installation for easy set up and installation (key used to unlock only). Digital keypad for alarm disabling.

Deters most would-be thieves with its bright yellow metal construction and ominous blinking bright flashing LED. Small enough to be stored under the seat.

Fits on all cars. Practical road rage protector as well!

HI-TEMPERATURE BRAKE CALIPER LACQUER

Several years ago, Porsche offered a painted red caliper as part of an optional performance package. Now LLTEK offers 3 colors of caliper paint. This is not an ordinary paint. It is a special two-step process utilizing high quality, heat resistant paint to change the personality of your car. Painting your calipers red, yellow or silver will not increase stopping power, but people will certainly stop to look at your car. This is a tasteful, low cost upgrade to make your Audi unique.

Available in 3 colors: Racing Red, Speed Yellow or Silver Metal

TOTAL BRAKING SOLUTION FOR A4/S4 (B5)

LLTEK pulls all stops with performance braking! Refer to our complete brake section for additional details (pages 15-19).

Fast overview:

Step 1 Better brake pads and rotors. LLTEK carries EBC hi-performance brake pads and EBC rotors plus world renowned Brembo crossdrilled rotor upgrades to fit your Audi car. Direct OEM replacement for added safety and braking power.

Step 2 Keep a constant pressure with the ultimate brakeline upgrade! High quality stainless steel braided brakelines that carry TUV approval.

Step 3 True high performance big brake upgrades with oversized rotors and multi pot caliper designs! We are talking huge and powerful brakes, up to 400mm diameter rotors (15in.)! Refer to our complete brake section for additional details (pages 15-19).

© 2000 Luis Aguayo

Cold Air Induction Kits: Almost FREE Performance!

Free and performance are two words seldom used in the same sentence. LLTEK cold air induction systems are designed to provide exactly that: increase performance without a heavy engine cost penalty without undue mechanical stress! Your engine needs air to live. Like an athlete, better breathing improves performance and an LLTEK designed cold air induction system increases intake airflow and allows for greater and cooler air mass to be delivered to the engine throttle body.

2.7T system installed

Available for all A4(B5) models: 1.8T • 2.8 12 valve • 2.8 30 valve • 2.7T (S4)

1.8T system

1.8T system installed

Dust-free high flow air filter

K&N is the recognized leader in replacement "low restriction and free flow" drop-in reusable panel filters. This installation or upgrade takes only moments allowing extra air to the throttle body to create a nice gain in horsepower. The unique pleated cotton grid traps dirt on the filter surface without impeding air flow. Order the optional cleaning kit to re-oil the filter surface and extend the life of this reusable filter. All sizes for Audi available.

Superior Silicone Performance Hoses by Samco Engineering

Turbo engines require the most high performance parts available. This is why LLTEK chose Samco hoses. These are premium extra durable quality silicone rubber hoses with 3 reinforcing plies. They are tougher, more reliable with better heat resistance in the harsh turbo environment. The surface is smooth for easy cleaning. Kits for the 1.8T have 4 hoses. Kits for the S4 (2.7T) have 12 hoses (shown below). Hose configuration and design subject to manufacturers current specifications.

Samco is a leading supplier to top racing and rally motorsport teams throughout the world.

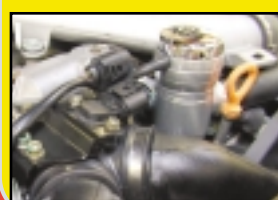

Turbos only: Type D-BOV TUNER SERIES

THE WORLD'S FIRST ADJUSTABLE DIVERTER AND BOV!

ALL-IN-ONE DESIGN FOR STREET OR TRACK

Introducing the precision manufactured ultra high performance Divertor replacement upgrade with full adjustable BOV (Blow Off Valve) features. Perfect for track or street application. This 4th generation super valve produces maximum throttle response and power. Easy to install, is stealth and sounds wicked! Best of all, flick the top to control sound volume⁽¹⁾. Flick the lower ring to determine when you want the valve to function.

⁽¹⁾ Limited sound performance when used on automatic or CVT equipped cars

Serious Performance Products for S4/A4 (B5)

Sway bars S4/A4

Sway bars reduce body roll during spirited or track use allowing for a superior tire contact patch. Once installed you will instantly feel better connected to the road with a far more stable riding platform.

S4 cars: replace only the rear sway bar only.
A4 cars: replace the front and rear sway bars.

Refer to pages 25-26 for more details

**Ishtook Motorsports

S4 race car at
Daytona**

Crosstower stress bar • A4/S4

If you have already invested in suspension upgrades, purchased larger wheels and tires or generally tend to corner hard, a crosstower stress bar is essential. The bar will also minimize chassis distortion and may prevent wheel and suspension damage. Each bar is engineered for maximum stiffness and durability. Easy installation.

Best for cars with 20,000 miles or greater.

S4/A4 Transmission Stabilizer Bar

The purpose of the Transmission Stabilizer Bar (TSB) is to reduce excessive drive-line movement, a common and annoying complaint of S4 owners worldwide. This is accomplished through the use of a beautifully crafted CNC lower aluminum tie bar and brackets (aircraft grade billet 6061-T6511) coupled to a no-vibration rubber transmission bushing. The results are immediate! S4 drivers will experience crisper shifts, reduced hesitation under spirited power acceleration and more power directed at the wheels.

Installation is a 30 minutes affair with no modification needed (perfect fit). Ground clearance remains unchanged. There is no interference with the exhaust system either OEM or aftermarket. All mounting hardware is included. The aluminum transmission stabilizer adds a very manageable 3 kg or 7 lbs to the car.

If you want to bring your S4 or A4 (B5) to a higher level of performance, if you want to strengthen and stabilize the front end, then this product will accomplish the task!

Specify A4 or S4, manual or automatic transmission when ordering. Anodized color bracket only available on special order. Design specification subject to change and improvement.

Easy installation • Ground clearance is maintained • No interference with exhaust system

Transmission Stabilizer Bars are available for S4 or A4 (B5), for quattro or FWD

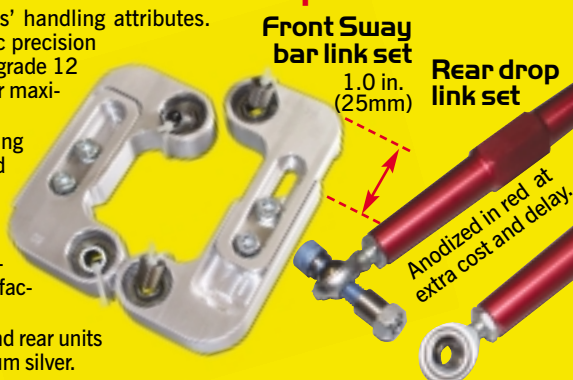

S4/A4 Adjustable Front Sway bar Links and Rear Drop Links

For serious car enthusiasts only seeking precise control over their cars' handling attributes. FRONT sway links are machined from 6061-T aluminum utilizing metric precision self-lubricating spherical European bearings with collars and bushings of grade 12 high strength hardware. Included are precisely engineered thrust plates for maximum contact locking surface and provides adjustment of 25 mm (1 inch).

The adjustable REAR drop links feature high quality lined rod ends allowing quick and easy turn buckle adjustments to set and control left and right hand sway bar corner loading. It takes minutes at the track or corner to set up new adjustments.

Benefits of the upgrade are felt immediately with suspension being smoothed out during high and low speed cornering, providing for better balance and control (eliminates jitters) as torsional preload from the sway bar (factory or aftermarket) is released.

No modifications needed. Install is under 40 minutes. It is suggested front and rear units be installed at the same time for full performance results. Product in aluminum silver.

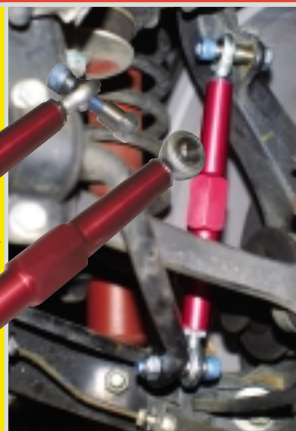

**Front Sway
bar link set**

1.0 in.

Anodized in red at
extra cost and delay.

S4 stainless (304) Performance Headers

Now available, the exact headers used by Istook Motorsports' racing team suitable for street and track. Pure CAD design for the smoothest and shortest exhaust path to maximize flow to a KO4 or KO3 turbo, resulting in quicker spool up and far less lag. Exhaust gas carry capacity is dramatically increased over stock. Each cylinder has a dedicated conduit merging at the collector creating reduced back pressure.

Flanges are CNC machined from 3/8" steel plating to eliminate warping under high pressure. Flanges also have sensor ports pre-machined so modification is unnecessary.

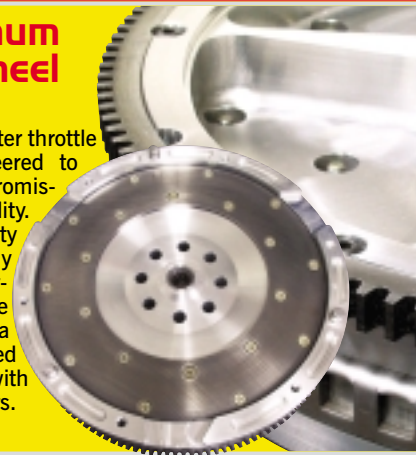

Special order - Allow several weeks for delivery.

Lightweight Aluminum performance Flywheel for S4 B5

A lighter rotating mass provides a faster throttle response. This flywheel is engineered to remove excess weight without compromising structural integrity nor street-ability. CNC machined from aircraft quality aluminum with a replaceable specially coated high carbon steel friction surface. The results: Awesome throttle response while moving rpm's at a much faster rate. For stock or modified S4 and RS4. Pedal feel is like stock with reduced chatter. Aircraft grade fasteners.

Special order only.

Kommand and Kommand "S" Exhaust Series (B5)

Refer to page 28

LLTEK has been a leading supplier of exhaust systems for Audi A4 (B5) cars for over 5 years. For detailed information regarding the Kommand and Kommand S (for S4), refer directly to the exhaust section within this catalog. Produced in stainless steel for long life, the Kommand Series has long been the favorite of sophisticated tuners. All systems target the low RPM range to produce extra low end torque. Although tuned to produce greater power, the Kommand Series keeps sound level to a responsible level (read not excessively loud). When combined with an LLTEK air induction kit (AIK), gains in performance reach very commendable levels. Systems are priced responsibly with a "direct by manufacturer lifetime warrantee" to the original purchaser. Go directly to our pages of Tuner Series Exhaust Systems for more information.

HID Xenon conversion kit

The best HID product since sliced bread! Easily convert Halogen bulb to genuine HID Xenon bulb without modification to your car electrical circuit nor replacement of the headlamp housings. Installation is a simple 1-2-3 and takes approximately an hour.

With HID Xenon, less is more. This lighting technology provides a better light output at 8,000°K with less power drain and bulbs last almost forever!

Refer to the lighting section in this catalog for more detailed information about HID Xenon technology and products.

H7 conversion kit shown.
Other configuration available.
Refer to pages 45 to 57

Video Camera Mount

Catch all the action with this precisely engineered and unique product. This is no plastic "cheapie". Instead you receive an adjustable and precision CNC machined aluminum arm weighing under 2.5 pounds (1 Kg) (excluding camera). The precision ballhead can support a video camera up to 8 pounds (3.2 Kg). The clever design of the sliding mount allows a fit on virtually all double post headrests. All hardware is stainless steel ensuring durability.

TYPE	PART NO	PRICE
VCAM.M	ASP00-01	\$199

KEY FEATURES:

- Adjustable for 360° panoramic view
- Installs in two minutes
- No modifications needed
- Reverse mount feature allows use on driver's or passenger's headrest
- Supports a camera of up to 8 pounds
- For 10 mm posts: adjustment is 4 to 6.5 inches
- For 14mm posts: adjustment is 5.5 to 8 inches

Perfect for:
Track events,
scenic drives,
spirited fun.

Carbon fiber engine cover upgrade

A. Carbon fiber 2.7T engine bay upgrade

For all 2.7T engine bay application (S4B5, A6 and allroad). These three replacement covers in genuine carbon fiber snap into place to create that extra amazing look of technical achievement. This cover kit also includes 3 LLTEK domed urethane badges ready to install.

B. Carbon fiber 1.8T (B5) engine bay upgrade

For certain 1.8T motors, this genuine carbon fiber engine cover simply snaps into place to create that technical racy look. Includes one LLTEK badge (shown installed).

Badges and Banner Corner

Windshield banners, high quality domed urethane badges and wheels centers to further characterize your car. A perfect complement to a any Audi car! Refer to the complete decal/badge section in this catalogue for additional information. (Page 42)
