# S4 THE 4.2 SUPERCAR

**A**udi has done a superb job with its new S4 SUPERCAR. This is no ordinary SUPERCAR. It is truly in a class by itself. Yet Audi designers chose to totally understyle the look of such a special car. In fact, at a glance you could easily mistake the mighty S4 for a regular 1.8T or 3.0 liter A4 variant. However, the LLTEK plan is to adjust all of that. Although the new S4 was recently released at time of printing, LLTEK stylists were already making plans to increase the car's visibility. Over time, these development plans will mature and grow. For now, LLTEK presents limited product and an outline of what it plans to make available for the new and powerful S4 in the way of styling emphasis and performance products. Of course, numerous A4 products already fit the S4 as certain parts are totally interchangeable. Suspension, exhaust, intake and other products are also being planned and will not be interchangeable with current A4 product.

Retrolux Sport Mirror on board (pages 34-37)!

**Your S4 is transformed into a major road burning machine.**

**Symbiosis of styling and function produces a unique killer look and asks the question of THE ORIGINS...**

**RS mesh upper sport grill with match painted frame (see page 117)**

Lower S4 4.2 center grill with optional match painted frame and medium mesh

**Composite splitter  
option shown with  
NEW RS sport grill  
without center hole  
(see page 117)**

**Retrolux Sport Mirror on board (pages 34-37)!**

**Genuine  
Carbon Fiber  
splitter option**

**ADD ON LOWER LIP SPOILER** UBERHAUS has designed and will produce a USA and European version of an exciting new S4 exclusive lip spoiler design with optional diffuser material for the center section. This easy to install product allows the full use of the S4 FACTORY bumper thus simplifying and reducing cost and complexity. This design approach allows for the retention of the factory S4 styling concept yet still allowing creative individuality. The result is a more serious and purposeful front end look that is still S4 SUPER-CAR Audi look. This is the subtle styling approach advocated by Uberhaus. A secondary carbon fiber lip spoiler and brake air diverter is also under design consideration.

**CORNER AIR INTAKES** Tastefully designed by UBERHAUS in conjunction with their lower lip spoiler product are dual replacement air intakes. These new intakes create a far stronger visual look making the vehicle a more seriously tuned car. Just install into place and go. The transformation is stunning, yet the Audi factory styling direction is preserved. Under consideration is a variation of the intakes to allow for the replacement of the fog light to the Serious Vision HID xenon lighting solution for true supercar illumination.

**FRONT GRILL** While the S4 grill is somewhat distinctive, it is far from a styling miracle, nor is the design powerful and unique. Our Caractere 3D recessed grill with optional edge match paint is a great place to truly begin the transformation detail. Kamei offers Titanium mesh front grills that also drop in neatly to give the S4 a more serious look. Exclusively from LLTEK is a new medium RS-like crosshatch pattern grill with a coordinating lower S4 grill with identical matching mesh. Also new from LLTEK is a badgeless RS4-look mesh style grill. S4 badging (not included) is easily transferred to the new grill or use the supplied LLTEK framed badge. RS Silver edge coating available. **Check out the exclusive DTM-look carbon fiber race grill with matching lower center grill!**

**EURO HEADLIGHT** As always, LLTEK presents the upgraded Euro version of the black headlight to produce a better and superior beam pattern providing greater lighting and safety down the road. This is an important upgrade if you are involved with spirited night time driving. Available in HID or H7.

**MIRRORS BY HAGUS** The new Hagus Retrolux mirror set was designed to grace every A4/S4. This clean new design creates a very distinctive look and sets off any S4 into a supercar look. The special aspheric anti glare blue tint mirror lens allows you to see several passing lanes over or directly behind the car, depending on how you do your adjustments. Full remote and anti-fog. Plug and Play except for easy wiring of integrated turn signal to side marker circuit. Available match painted to car color or RS silver coating. Refer to the sport mirror section in this catalog for details.

**What's new  
on this S4  
Supercar  
for you!**

- 1. New DTM-look S4 race grill in carbon fiber (fits A4)**
- 2. New S4 Retrolux mirrors(optional RS Paint available)**
- 3. NEW LED hi-performance headlight (Yes! LEDs...)**
- 4. New Air Scoops and lower grill (optional carbon fiber)**
- 5. New testosterone lower air dam spoiler**

**Optional no corner indentation  
(2 removed). Just ask for it!**

**Sculptured  
in every detail**

**Air scoops look stunning, install easily  
while utilizing the S4 factory fog lights**

**“... the most exciting styling we have seen so far for this car... I want some of that!”**

**HEADLIGHT TREATMENT** All eyebrows and other headlight treatments fitting a traditional A4 also fit on the new S4 allowing for some interesting personalization. It takes only minutes to restyle each headlight. Check the A4 (8E) section for additional details.

**COMPLETE FRONT BUMPER** Caractere produces a full front bumper for the A4 that will perfectly fit on the S4 SUPERCAR. Product is guaranteed to make the S4 something very special and creates unique design and distinction. The Caractere is manufactured in PURIM, a semi-flexible material like the original bumper. Add the Zender lip spoilers to the the Caractere bumper for a truly unique look (CarZen look on the following page).

**UPPER ROOF WINDOW SPOILER** All of the A4 (8E) sedan roof window spoilers and Avant upper roof spoilers will fit on the S4 SUPERCAR, allowing the S4 owner to choose any of these products for technical personalization. Installation of an Avant spoiler also means the rear glass will stay cleaner longer.

**TRUNK SPOILER (SEDAN)** Audi has included a nice little ultra conservative trunk spoiler on each S4. This styling design might appeal to some. However, in conversation with many Audi enthusiasts considering the purchase of an S4, they tell LLTEK to develop an alternate solution to augment the supplied Audi mini spoiler. Since we cannot predict the degree of difficulty of removing the factory spoiler without a trunk repaint, our designers are proposing solutions to fit over the factory spoiler to hide it or alternatively to work with it. Several design schemes are under discussion so check back with LLTEK or monitor our website for up to date data. We will have several alternate designs.

**EXHAUST SYSTEM: SNIPER PRO SERIES** LLTEK has produced superior performance exhaust systems for the 4.2 motor for over three years. We understand the motor, its characteristics, its need to breathe. Look for LLTEK to offer its micro adjustable system in dual and quad tips configuration to allow the motor to go to its next level of performance. A quality deep throat sound is assured. However do not look for an overly loud or abusive sound. Power gains are conservatively targeted for 14 – 18 HP.

**SIDE SKIRTS** All side sills manufactured and designed for the A4 should easily fit on the S4. Therefore no Audi enthusiast need be denied this interesting styling product to create a true “hunkered down” look. Product is available in several different types of material covering Purim, ABS and composite.

**S4 Dual exhaust lower valance with RS mesh...**

**S4 Quad exhaust lower valance with RS mesh...**

**S4 Zender lower valance (dual exhaust only)**

**Several rear valance styling options to better distinguish the true nature of the S4! Optional Stainless steel bolt styling, accent color in Titanium R paint or Retrolux Sport Mirrors with built-in turn signals. Call or visit [WWW.LLTEK.COM](http://WWW.LLTEK.COM) for inspiration!**

**S4 Dual Valance on board!**

**REAR BUMPER VALANCE** LLTEK will offer several creative rear bumper valances to fit on the back of the S4. Some will be designed to accommodate dual or quad exhaust tips. By personalizing and individualizing the rear of your car, other drivers will never forget you as you swiftly pull away.

Rear bumper paint note: If your S4 car was delivered with a fully painted rear bumper and you installing the UBERHAUS RS lower center valance (in dual or quad tip configuration), you do not have to paint nor cut the section of the FACTORY bumper behind the mesh. Instead, LLTEK supplies a self adhesive blackout mat applique. The black mat installs in seconds and can be easily removed.

**SATIN FINISH S4 ALUMINUM PEDAL SETS** The new LLTEK Tuner Series brushed aluminum S4 pedal sets will create a technical and racy upgrade to the car's interior. Manufactured in Germany, these custom ultra high quality pieces are solid and thick. A custom matching design “perfect fit” dead pedal (footrest) is also available and yes, they do fit on the A4!

**Retrolux Sport Mirror**

**Pages 34-37**

**FLOOR MAT PROTECTION** The oversized custom made A4 all season, all purpose mats are the perfect solution to all year usage and will fit the S4. The long-lasting and heavy-duty black or charcoal grey carpet material is bonded to a plastic waterproof tray preventing contamination of the area below. These raised edge mats are custom molded to the floor pan of the S4. A reinforced heel pad provides further long life. Fits the S4 dual pin mat holder perfectly. Bonded LLTEK logo complements the design.

**TRUNK LINERS** LLTEK carries “Made in Germany” trunk liners specifically for the S4 sedan and S4 Avant. With a smart non-slip center area, this protective liner is a must, particularly if you are a skier/boarder, cyclist, golfer, etc. If you carry gardening equipment or mere groceries, this trunk liner is a protective must.

**SHIFT KNOBS** There are two great Zender upgrades to personalize the shift knob to make your car really your car. This is a great interior personalization product.

**REAR TAIL LIGHTS** The S4 accepts all tail lamps designed for its A4 cousin. There are many versions to choose from, each creating a car of distinction, and do not forget the S-YO (FATS) bulb. Designed exclusively for the S4 (fits regular A4) is the Krystal RS!

**BRAKING PRODUCTS** Look to LLTEK to carry a host of braking upgrades from pads to rotors to calipers and brake lines.

**WHEELS** LLTEK offers numerous wheel performance upgrades all of which produce outstanding looks and exceptional cornering.

**AIR INTAKE** Look for LLTEK to show a superior air intake system for the S4 4.2 motor to allow for full heavy breathing. This is a must for all serious and adventurous drivers.

**SUSPENSION** Look to LLTEK to carry a host of suspension and handling upgrades.

33 Sports mirrors: Retrolux – wide view, anti-glare (optional)	Two variations: silver back or painted back. Full remote control S4/A4. Heated and anti fog
34 Suspension upgrades – coilover route	For optimum control and handling with height adjustment
35 Suspension upgrades – shock and spring route	For sport and performance at an affordable cost
36 Tail lamp upgrades in E code specification	Several choices for the sedan. Limited choices for Avant. Note: Krystal RS is designed for S4.
37 Tail light mask – Avant and Sedan variations	The easy way to stylize either Avant or Sedan: Match Paint S4/A4. Fits FACTORY shape only.
38 Tire programs sold with wheel program	Great prices, great tires with bonus program of accessories
39 Rear mounted spoilers – LLTEK has the "hole solution"	6 models for sedan / 3 models for Avant. No repaint trunk solution for sedan
40 Upper rear window diffuser to truly complete the look	Four models that easily install to complement the S4/A4 car
41 Wheel upgrades to individualize and creates superior control	Top wheel products for the S4 super car from 17-20 inches

Several of the above items are under design consideration and may or may not be produced. Always call LLTEK for the latest in S4 development and technology.

<sup>(1)</sup> Requires modifications and extra parts to the headlight washer system or elimination of the washer system altogether.

## CarZen symbiosis represents an alternate expression of styling for S4 sedan and Avant

To install a Caractere or Rieger full front bumper on the S4 8E, a relocate and remount of the headlight washer system is necessary. You must also purchase the A4 8E headlight washer caps. If the bumper is ordered painted, LLTEK will purchase the caps on your behalf at a cost of \$44 (set). The paint will be applied to the caps for free. DTM-look grill in carbon fiber also pictured.

### 3 LED tail lights!

(Refer to page 55 for details)
