Zender stylists strongly believe in the quiet subtle approach to upgrade the new Audi A4. There is no question about Zender results. Small changes do produce large and beautiful results. With just minutes of installation time, the Audi enthusiast can produce dramatic results to the front and rear of the new A4 car.

Examine the visual effect of the new Zender air intake scoops. Simply remove the Audi part and insert the newly styled replacement part which can also be supplied by LLtek pre-painted. Then install the tastefully designed corner mini air deflectors and a new front end is born. Add a Kamei front grill with Kamei top and bottom headlamp treatment or UBERHAUS headlamp mask and the change to the car's personality is dramatic.

Zender did not forget the rear of the A4. Their stylist chose a simple yet effective way to restyle this part of the car. Zender has created a styling part to fit on to the factory lower bumper. Pictures do not do this change justice.

Hagus Wide View Retrolux mirrors with optional integrated turnsignals
Pages 34-37

The effect is quiet yet dramatic. Add the UBERHAUS slide-on exhaust tips to bulk up the factory mini type and "voilà", instant "cool"! Alternatively order the new LLtek stainless steel full exhaust system for extra performance and a great sound.

Zender has designed two rear trunk wings. The Type is very quiet, very subtle and sits directly on the car's trunk. The second wing is one of our favorites. It is a mid high wing with an integrated brake light. It is a tastefully styled wing with perfect edge fit. While not for the meek, this wing is a noticeable styling upgrade, however not an overly aggressive change.

Zender attention to detail shines through.

Zender air intake scoops quickly replace the traditional factory setup.

DARE TO BE DIFFERENT! Choose between several dramatic and very exciting tail lamp upgrades. Each complete the transition from an everyday Audi into a unique personalized vehicle. **Do it NOW!**

Lip spoilers complete the transformation from ordinary to exciting.

Zender lips can be installed on the CARACTERE bumper for CarZen-look *

1 "Classic" spoiler

2 "Sport" spoiler

A difficult choice: (1) low profile Classic trunk spoiler, (2) high profile Sport spoiler with integrated brakelight. Both complement the **CARACTERE** roof spoiler

Superb roof spoiler reflects smooth approach to design

CARACTERE Sport trunk spoiler with integrated brakelight

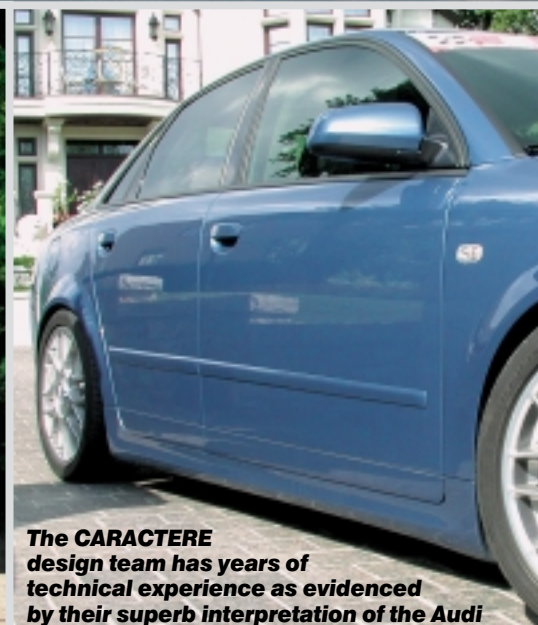

CarZen upgrade shown

CarZen upgrade shown

The CARACTERE design team has years of technical experience as evidenced by their superb interpretation of the Audi TT. However the quality, fit and finish of the new A4 aerodynamic kit from CARACTERE is without doubt a crowning design achievement. The elegant A4 skirts are smoothly integrated into the car. All in PURIM.

CarZen upgrade shown

KERSCHER: The styling of Kerscher products for the new Audi A4 8E can truly be labeled as "unique and innovative". The add-on lower front spoiler is perfectly styled. The optional lower real carbon fiber splitter turns the front design into a technical marvel. There is abundant room to easily install the Serious Vision HID Xenon driving lights. Alternatively choose the fog light adapter to re-use the factory fog light system.

The Kerscher rear valance design speaks for itself. There is total exhaust tip flexibility (single dual, Quad). The optional rear center real carbon fiber

matches the front carbon fiber and shows technical attention to detail. The USA/CAN version is a cap rear valance marginally different than its European counterpart while still preserving the overall optical effect.

Kerscher's approach to design the side skirts shows perfect integration into the overall design. This indented look works perfectly with the car. Choose the LLTEK supplied lower door stick-on prepainted covers to mask the black factory molding.

Hagus Wide View Retrolux mirrors with optional integrated turn signals
Pages 34-37

3 Front bumper looks

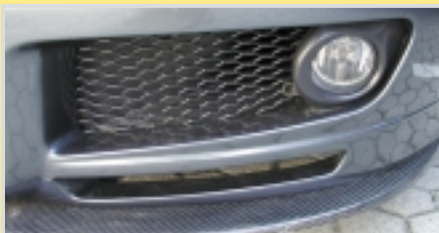

You be the designer

Pure aesthetics, maximum airflow...

... with the OEM fog lights (adapter) ...

...plus a real carbon fiber splitter!

Elegant yet powerful looking without the carbon fiber splitter. A real sleeper performance machine!

2 Cool carbon fiber aero parts

1. Lower front splitter is a technical and aggressive look
2. Genuine Carbon Fiber splitter links exhaust pods of the Kerscher designed rear bumper, lending an absolute hi-tech sportiness akin to a race car.

Real carbon fiber lower splitter adds a unique and technical flair to the outstanding KERSCHER front bumper. A second must have option is the genuine rear carbon fiber diffuser for the rear lower valance.

Carbon fiber lower splitter air spoiler

Details of carbon fiber rear diffuser foil

Angled view of rear carbon fiber diffuser foil

Sleeper look with a nasty bite. Kerscher's excellent styling and quality fit and finish for the demanding driver. Sign me up NOW!

Kerscher vision of the A4 Avant: Awesome, powerful, purposefull!

Rear end are more important than one might think...

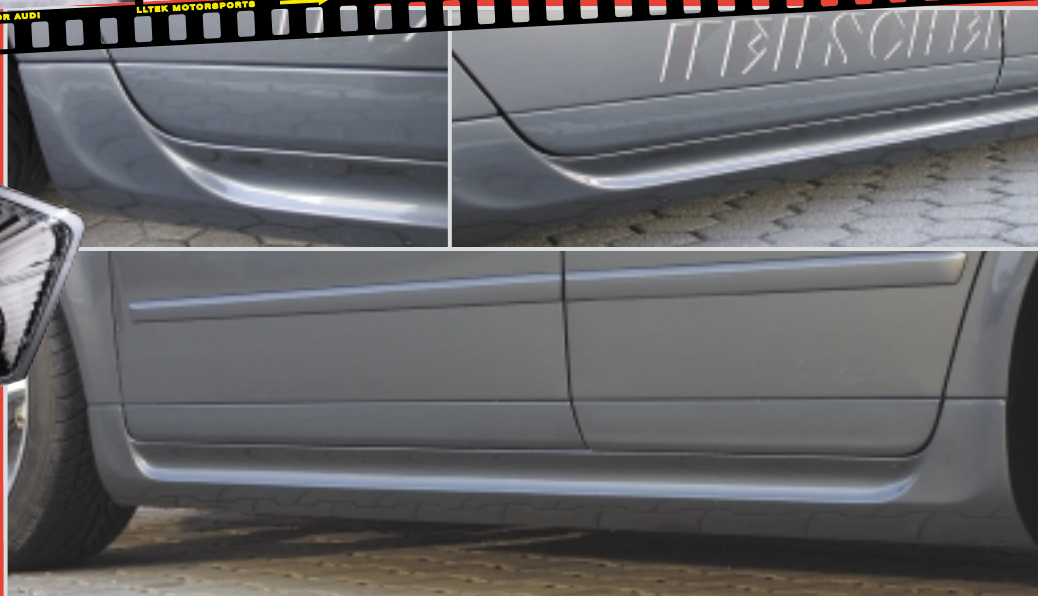

Quad tip street demeanor, even without a trunk spoiler...

USA version will be optically similar to the above Euro versions • COOL!

DARE TO BE DIFFERENT! Choose between several dramatic and very exciting tail lamp upgrades. Each complete the transition from an everyday Audi into a unique personalized vehicle. **Do it NOW!**

Lower door valance executed in true Kerscher dynamic style.

TUNER@LLTEK.COM

LLTEK Motorsports is not affiliated with Audi AG nor Audi of America nor Porsche AG nor Porsche Cars North America Inc. nor Volkswagen AG nor Volkswagen of America Inc. in any way.

Only Rieger Tuning offers two completely different front end design styles for the new A4. Choose between a full bumper replacement (Type RFB.8E) or the add-on lower half bumper (Type RFL.8E). Both designs feature aggressive yet tasteful styling.

The full bumper features extra large openings for superior cooling with the possibility of an extra large intercooler system for turbocharged motors. It also fits the new S4 (8E).

With the three large openings of the full bumper, you can also substitute the factory fog lights for LLTEK's Serious Vision HID Xenon driving lights (pictured below). This is a monumental lighting upgrade and LLTEK will pre-install the HID lamps free when the bumper is ordered. This HID upgrade comes with pre-installed and inline relay, fuses and remote receiver. Also included is the remote emitter to activate the HID driving lights.

For more information on this very superior HID lighting upgrade, refer to the lighting section in this catalog (pages 45-57).

LLTEK will also stock four different fitting Rieger rear valances. All feature the same outward design allowing total exhaust system flexibility but none are interchangeable. Please see the pricing section for additional fitting details. Then choose the exhaust and exhaust tip program that suits your needs (dual, quads or over tips).

Hagus Wide View Retrolux mirrors with optional integrated turn signals

Rieger Tuning has again cleverly chosen to use their signature sculptured side skirt design. Other major German car manufacturers have copied this unique twisted yet smooth design. However the superior execution has always been by Rieger. Remember, LLTEK can also supply the four pre-painted lower door over moldings eliminating the need to locally paint these four lower Audi components. Just peel and stick and the black moldings disappear in an instant when you order this product pre-painted.

Powerful TYPE SV3000 HID Xenon driving light option in TYPE RFB.8E front bumper

FREE installation⁽³⁾

TYPE RFL.8E lower replacement spoiler • TYPE RS(DP).8E sculptured side skirts • TYPE RT.8E trunk spoiler

Tuning

JE DESIGN has created revolutionary designs for interpretation of the new A48E sedan and Avant. Manufactured in ultra high quality PURIM, this aerodynamic kit produces extraordinary visual results. The front add-on lower bumper section is fitted with stylish cues. The optional air intakes complete the frontal treatment.

Examine the detail in the JE DESIGN 3-piece rear trunk spoiler. Next, take a careful look at the coordinating roof spoiler. Again outstanding design. Side sill extensions have unique detail with a fine groove look. No Avant should be without the JE DESIGN SHARK FIN and companion Avant roof spoiler. Finally, the treatment of the lower rear valance is truly unique and exciting, allowing for either quad or dual exhaust systems.

Check out the JE DESIGN Visage wheel. It is as technically detailed as the beautiful line of chrome pedals with stylish raised non-slip rubber specially made for the A48E. Styling comes together with LLTEK and JE DESIGN!

Sedan roof spoiler with 2nd color paint option
